

# Clean Factory New Rolex Explorer M226570-0001 White Dial

**Brand:** Clean Factory  
**Product Code:** M226570-0001  
**Availability:** In Stock  
**Weight:** 0.00kg  
**Dimensions:** 0.00cm x 0.00cm x 0.00cm

**Price:** ~~\$799.00~~ \$569.00

## Short Description

I am very happy to recommend the Rolex Explorer IIM226570-0001 replica watch released by Clean Factory to my friends. This replica watch has a unique white dial and is equipped with a customized 3285 movement. The style is classic and elegant, and it is long-lasting. It is easy to match with it in daily life. In its simplicity, it contains the super power of being versatile.

At the same time, it is also very practical, and the super-high replica craftsmanship creates a product that can rival the original. I recommend this watch and look forward to tasting it.

## Description

Shocking news, let me introduce you to the new Rolex Explorer 2 watch 226570 from [Clean Factory](#). We have taken the essence and removed the dross to create this watch, and made it as close to perfection as possible. We pursue excellence and continuous progress to create a more perfect replica watch for you. The first impression of this watch is the pure and clean white appearance, which looks comfortable and durable. This watch has left an important mark in the watch industry. The replica watch only has a white dial to choose from, with a metal strap of the same color. The biggest highlight of this release is the 3285 movement, which is similar to the 126710 movement, but has undergone key size adjustments and improvements.

Clean Factory 226570 new Rolex Explorer2 replica watch, this one is white, simple and clean. Equipped with 3285 movement: a game changer for Rolex lovers, bringing a brand new experience.

Follow us to see what the new surprises are:

**Luminous display:** The hands and hour markers are filled with Chromalight luminous material, which has a long-lasting blue luminous effect, making it easy to read the time in a dark environment.

**Hands and hour markers:** Black-edged hands and hour markers accurately replicate the design and shape of the original

**GMT hand:** Orange 24-hour GMT hand for reading the time in a second time zone

**Introduction to the 3285 movement**

The outstanding feature of the Clean Factory 226570 Explorer 2 is the 3285 movement:

**Size and compatibility:** Although similar to the 126710 movement, the 3285 movement in the 226570 is larger, ensuring a better fit and function within the case. This adjustment corrects a common problem in other market versions, namely incorrect calendar position due to mismatched sizes.

**Movement development:** Developing a new size for the Explorer 2 was a major challenge. Since the Explorer 2 watch is less common, the movement factory has been hesitant to make a movement specifically for this model. Clean Factory spent more than a year convincing Dandong Movement Factory to independently develop this unique movement.

**Dial and collar font differences**

There are significant differences between the 226570 and the older 216570 models, especially in terms of the dial and collar fonts:

**Movement, case and hands updates**

To improve the Clean Factory 226570 Explorer 2, we made several key changes:

**Movement changes:** As mentioned earlier, the movement has been upgraded to 3285, which perfectly fits the 42mm case of the 226570. Custom replica movement, similar in appearance to the Rolex Caliber 3285 automatic

Provides a power reserve of approximately 70 hours

Implemented date display and 24-hour GMT function

**Font evolution:** The 226570 adopts an updated font to distinguish it from the 216570. The change in font style and weight is a subtle but important update that enhances the overall appearance and aligns with Rolex's latest design language.

**Movement, Case and Hand Updates**

To improve the [Clean Factory Rolex](#) 226570 Explorer 2, we made several key changes

**Case and Hand Modifications:** The case and hands have undergone subtle but meaningful changes that enhance the overall beauty and functionality of the watch.

**Bezel Font Thickness:** The thickness of the bezel font has also been revised. While the 216570 had a thinner font, the 226570 fits in with modern styles, with the white dial version introduced in 2023 showcasing a thicker font.

The new [Rolex Explorer replica watches](#) have always been a unique model in the [Rolex replica watches](#) collection, appreciated by collectors for their unique design and functionality. However, a truly perfect replica version was hard to find - until the release of Clean Factory's 226570. This model corrects many of the inaccuracies found in previous versions, especially the custom-developed 3285 movement.

**Verdict:** A rare and special timepiece that combines beauty with practicality.

**Specification**
