Price: ~~\$1,100.00~~ \$789.00

Short Description

With Clean Factory releasing the Rolex Daytona 116509-78599 replica watch, let's explore it together. This replica watch has a unique black dial and is equipped with a customized 4130 movement. It is loved for its extraordinary craftsmanship and unparalleled appearance.

Description

Still bringing you the top replica watch, the Rolex Daytona series. This model has a black dial and is paired with a metal strap of the same color. The metal texture is superior, cool, and versatile. It is an inviolable beauty to wear casually. People who like black often have a calm heart, are low-key and peaceful, hide their edge, and judge the situation. Just like the feeling of this watch, it seems low-key but unusual; all the essence is waiting for you to taste!

In terms of workmanship, the black enamel dial is impeccable, with zero color difference; the three-layer dial is carefully assembled, and each component is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

Clean Factory's Rolex Daytona replica watch is made of 904L material, 4130 movement, AR strap, simple dial/unique version, simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edge. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

This watch is equipped with a new Cal.4130 automatic winding movement customized exclusively by Rolex, and the thickness is consistent with the original. Each function is 100% realized and equipped with an unprecedented customized KIF shock absorber. The design of the entire assembly is consistent with the original Cal. 4130 movement, and all three splints are impeccably consistent with the original, from chamfers to sunray patterns, respecting the original design at a 1:1 ratio. This not only surpasses all Daytona replicas on the market but is also the only replica that can match the original.

The luminous filling is of moderate height, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, with a slight dent at the tail. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

Paired with Clean Factory's new internal memory steel and metal strap

Learn more about the features of the replica.

High Simulation: Clean Factory strives to be consistent with the original in details, including the material and design of the case, bezel, strap, dial, and hands, so that the replica looks close to the original.

Material and Craftsmanship: Use the same 18K white gold, sapphire crystal mirror, and high-grade strap materials as the original to ensure that the visual effect and touch are the same as the original.

Movement Appearance and Function: The imitation Rolex Caliber 4130 movement has an appearance and function that are almost the same as the original, with a central chronograph function to ensure high accuracy and stability.

Details: The red details on the dial, the sub-dial design, the luminous coating of the

tachymeter scale, and the hands are all accurately restored to the original, ensuring that the overall look and feel are consistent with the original Rolex.

Suitable for daily wear: The high degree of simulation and high-quality materials make it suitable for daily wear and reflect a luxurious taste.

Specification

Features	
Brand	Rolex
Model	Cosmograph Daytona
Serial Number	116509-78599
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.3285 Automatic Movement
Case Size	40mm
Case Material	18K white gold, the same color as the original 18K white gold, not only has excellent corrosion resistance, but also provides a high gloss and luxury.
Hands and Markers	The white gold-plated hands and stick hour markers, both filled with luminescent Chromalight coating, provide a long-lasting blue luminescent effect and ensure easy reading of the time in low-light conditions.
Bezel	Fixed platinum bezel with an engraved tachymeter scale for speed measurement, a hallmark feature of the Daytona design. The polished bezel perfectly complements the refined look of the watch.
Crystal	Scratch-resistant sapphire crystal with an anti-reflective coating to reduce glare, ensuring clear visibility and protection from wear and tear. The sapphire crystal maintains the dial’s clarity, keeping it scratch-free and looking pristine.
Dial	The bold black dial is complemented by white subdials for chronograph functions, creating a striking contrast that ensures readability. Luminous hands and markers guarantee visibility even in low-light environments. Equipped with a tachymeter scale to mea
Bracelet	Type: 950 platinum Oyster bracelet, providing both durability and elegance. Features an Oysterlock

folding clasp for secure and comfortable wear. The bracelet's design creates a harmonious balance between luxury and practicality.
