Short Description

Clean Factory has released a replica Rolex Daytona 116509. The replica watch is available with a black dial and is equipped with a customized 4130 movement. It is dynamic and stylish with excellent quality. We use exquisite craftsmanship to bring you high-quality replica watches, which will live up to your love.

Description

I highly recommend the Clean Factory Daytona 116509 replica watch. This watch has a black dial and a dark grey rubber strap. This watch is mainly black, with red in the details such as the second hand. This makes the whole watch not too dull and adds jumping colors to the shape of the whole watch. It can be said that the details brighten the whole and are the finishing touch.

Various more detailed highlights are presented below:

This series has achieved an impeccable black enamel dial with zero color difference, and each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

Clean Factory's Rolex Daytona replica watch is made of 904L material, 4130 movement, AR strap, simple dial/unique version, simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The watch is equipped with a new Cal.4130 automatic winding movement customized exclusively by Rolex, and the thickness is consistent with the original. Every function is 100% realized, which not only surpasses all Daytona series replicas on the market but is also the only replica that can be comparable to the original. The customized KIF shock absorber is used unprecedentedly, which is known for its high-end positioning. Usually, due to cost constraints, the development of replica movements will avoid the use of such shock absorbers, but C Factory spared no effort to ensure the use of such shock absorbers, which is really a pleasant surprise.

The luminous filling is of moderate height, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, with a slight dent at the tail. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

High Simulation: Clean Factory strives to be consistent with the original in all details, including the material, polishing, and craftsmanship of the case, dial, and bezel, so that the visual effect of the replica watch is close to the original.

Material and Craftsmanship: Use 904L stainless steel and sapphire crystal mirror consistent with the original to ensure that the case and strap are almost the same as the original in terms of vision and touch.

Movement Appearance and Function: The appearance and function of the imitation Rolex Caliber 4130 movement are almost the same, with a chronograph function and a second-hand stop device, high precision, and stability.

Detail Processing: The dial details (such as hands, sub-dials, tachymeter scales, etc.) and brand logos are highly restored, and the fine engraving and logos make the appearance of the replica very close to the original.

Suitable for daily wear: Due to its high degree of simulation and high-quality materials, this replica watch is not only close to the original in appearance but also very suitable for daily wear.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	116509
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
Hands and Markers	Black-edge hands and hour markers precisely replicate the design and shape of the original
Bezel	Fixed stainless steel bezel with a tachymeter scale, ideal for measuring speed over a known distance. The polished bezel adds refinement and complements the overall sleek look of the watch.
Crystal	Scratch-resistant sapphire crystal with an anti-reflective coating for maximum clarity and protection from everyday wear. The crystal maintains optimal visibility and ensures the watch remains in excellent condition.
Dial	The black dial is beautifully contrasted with white hour markers and subdials for enhanced legibility. Equipped with luminous hands and markers, providing clear visibility in low-light conditions. Chronograph subdials at 3, 6, and 9 o’clock, each serving
Bracelet	Type: Oyster bracelet made from 904L stainless steel, combining strength and comfort for daily wear. Equipped with an Oysterlock folding clasp, ensuring a secure and adjustable fit on the wrist. The bracelet’s brushed and polished finishes enhance the wat
