Description

Clean Fa

Let's step into the wonderful world of replica watches. Here is this Rolex Daytona M116518LN-0078 replica watch, which is produced by the factory. The dial color is black, with a rubber strap and gold elements. A versatile and durable replica watch may not be so exciting, but with its exquisite craftsmanship, it shows you its strong and stable quality and gives you an amazing experience.

This replica watch has a precise enamel black dial with zero color difference, a carefully assembled three-layer dial, and each part is electroplated. The bezel is filled with precisely matched black oil to present the same matte effect as the original.

In addition, the watch is equipped with a new customized Rolex-exclusive Cal.4130 automatic winding movement, which matches the thickness of the original. Every function is 100% realized, equipped with an unprecedented customized KIF shock absorber. The entire assembly follows the design of the genuine Cal.4130 movement, and all three plywoods perfectly reflect the genuine product from the chamfers to the sun pattern, maintaining 1:1 respect for the original design. This not only surpasses all Daytona replicas on the market but is also the only replica that can compete with the original.

Clean Factory's replica Rolex Daytona watch uses 904L material, 4130 movement, an AR strap, a clean dial/unique version, a clean ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no visible white edges. The curvature of the glass edge is consistent with the genuine product, the height of the ceramic ring protruding from the glass is consistent with the genuine product, the ceramic ring has a stronger rounded feel, the font is clean, and the edge of the ceramic ring is slightly rounded.

The luminous fill height is moderate, and the brightness is good; the font is printed three-dimensionally, and the size of the small black circle is consistent with the genuine product.

The strap or case fits seamlessly, the top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

Clean Factory brand new built-in steel sheet, fluororubber strap
