Short Description

Clean Factory has carefully created and released the Rolex Daytona M116509-0055 replica watch. The replica watch is available with a black dial and is equipped with a customized 4130 movement. The impeccable quality and beautiful appearance will capture your heart.

Description

Continue to explore the top Rolex Cosmograph Daytona M116509-0055 replica watch produced by the factory. This watch has a black dial and a silver metal strap. The main black and gray tones are cool colors. If you like low-key colors, you may wish to pay attention to this one. The color is plain but very glossy. The whole watch is of excellent quality, not in the limelight, but of extraordinary strength. In the calm days, I will accompany you and protect you all the time.

Please pay close attention to the following details:

Exquisite enamel black dial, zero color difference, carefully assembled three-layer dial, each part is electroplated. The bezel is filled with precisely matched black oil to present the same matte effect as the original.

The watch is equipped with a new customized Rolex-exclusive Cal.4130 automatic winding movement, which matches the thickness of the original. Each function is 100% realized and equipped with an unprecedented customized KIF shock absorber. The entire assembly follows the design of the genuine Cal.4130 movement, and all three plywoods perfectly reflect the original from the chamfers to the sunburst pattern, maintaining 1:1 respect for the original design. This not only surpasses all Daytona replicas on the market but is also the only replica that can rival the original.

Clean Factory's replica Rolex Daytona watch uses 904L material, 4130 movement, an AR strap, a clean dial/unique version, a clean ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, and no white edges can be seen. The curvature of the glass edge is consistent with the original, the height of the ceramic ring protruding from the glass is consistent with the original, the ceramic ring has a stronger rounded feel, the font is clean, and the edge of the ceramic ring is slightly rounded.

The luminous fill height is moderate and the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case fits seamlessly, the top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116509-0055
