## Short Description

Come and pay attention to Clean Factory's release of the Rolex Daytona M116515LN-0015 replica watch. The replica watch is available with a chocolate dial and is equipped with a customized 4130 movement. This is a replica watch with a beautiful and exquisite appearance and excellent quality.

## Description

Let's continue to introduce this replica Rolex Cosmograph Daytona M116515LN-0015 produced by the Clean Factory. The dial color of this replica watch is quite special; you can call it chocolate color, with a dark gray rubber strap. The color matching is beautiful, unique, and unconventional. It can be said to be the finishing touch for daily matching, with unexpected highlights, which will make people's eyes bright and leave a deep impression.

Clean Factory's replica Rolex Daytona watch is made of 904L material, an AR strap, a clean dial/unique version, a clean ceramic bezel, and polished factory hands, with a thickness of 12.2-12.3.

Exquisite enamel black dial, zero color difference, carefully assembled three-layer dial,

each part is electroplated. The bezel is filled with precisely matched black oil to present the same matte effect as the original.

The watch is equipped with a new customized Rolex-exclusive Cal.4130 automatic winding movement, which matches the thickness of the original. Each function is 100% realized, equipped with an unprecedented custom KIF shock absorber. The entire assembly follows the design of the original Cal.4130 movement, and all three bridges perfectly reflect the original, from the chamfers to the sunburst pattern, maintaining 1:1 respect for the original design. This not only surpasses all Daytona series imitations on the market but is also the only replica that can match the original.

The seam between the glass and the case is completely transparent, and no white edge can be seen. The curvature of the glass edge is consistent with the original, the height of the ceramic ring protruding from the glass is consistent with the original, the ceramic ring has a stronger rounded feel, the font is clean, and the edge of the ceramic ring is slightly rounded.

The luminous fill height is moderate, and the brightness is good; the font printing is three-dimensional, and the size of the small black circle is consistent with the original.

The strap or case fits seamlessly, the top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.
