Short Description

This issue recommends the Rolex Daytona M116503-0001 replica watch released by Clean Factory. The replica watch is available with a white dial and is equipped with a customized 4130 movement. It has superior quality and a stylish appearance.

Description

Creating a world of replica watches, here is the Rolex Cosmograph Daytona M116503-0001 replica watch produced by Clean Factory. This watch has a white dial and a metal strap. The strap and panda eyes are both designed in gold. The combination of white and gold has a good temperament, hiding an elegant and gentle feeling. It is simple, but not simple. Its beauty is revealed everywhere.

This replica Rolex Daytona watch from Clean Factory is made of 904L material, equipped with 4130 movement, AR strap, clean dial/special edition, clean ceramic bezel, and polished original hands, with a thickness of 12.2-12.3 inches.

This watch has an impeccable enamel black dial with minimal color difference. The three-layer dial is carefully assembled and each component is electroplated. The bezel is filled with a precisely matched black oily filler, presenting a matte effect consistent with the

original.

The watch is equipped with a new customized Rolex exclusive Cal.4130 automatic winding movement, and its thickness is consistent with the original. All functions are 100% accurate and equipped with an unprecedented customized KIF shock absorber. The entire assembly process follows the design of the original Cal.4130 movement. The three splints from chamfers to sunburst patterns are perfectly echoed with the original, respecting the original design 1:1. This not only surpasses all Daytona series imitations on the market, but is also the only replica that can compare with the original.

The joint between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is consistent with the original, and the height of the ceramic ring protruding from the glass is consistent with the original. The ceramic ring is rounder and more three-dimensional, the font is clear, and the edge of the ceramic ring is slightly rounded.

The luminous filling height is moderate, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap/case fits seamlessly. The top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap/case is concave with the watch head, which is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116503-0001
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
