Price: ~~\$1,500.00~~ \$1,079.00

Short Description

I recommend the Rolex Daytona 116518LN-0037 replica watch released by Clean Factory to my friends. It is perfectly equipped with a customized 4130 movement and a unique white dial with gold-rimmed elements. Find a little difference in the classic.

Description

Follow me to explore the top replica Rolex Daytona series from Clean Factory. This is a replica watch that makes people fall in love with it at first sight. The perfect combination of black and gold and the diamond texture decoration on the outer ring of the dial highlight the uniqueness of this watch. Just like the twinkling stars under the charming night sky, it attracts endless reverie. Thoughts seem to drift into the vast universe in an instant. With it, you can let your imagination run wild.

The following is a detailed interpretation of the various features of this watch:

The impeccable black enamel dial has zero color difference, and each component on the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

The Rolex Daytona replica watch from Clean Factory is made of 904L material, 4130 movement, AR strap, simple dial/unique version, simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The height of the luminous filler is moderate, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and there is a slight dent at the tail. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

The strap is equipped with an 18K gold Oysterlock folding safety buckle and Easylink 5mm extension links, which allow users to easily adjust the length according to their needs.

In addition, it is also equipped with Clean Factory's new internal memory steel sheet and fluororubber strap.

The watch is equipped with a new Cal.4130 automatic winding movement exclusively customized by Rolex, and the thickness is consistent with the original. Every function is 100% realized, equipped with an unprecedented customized KIF shock absorber. The entire assembly is designed in the same way as the original Cal. 4130 movement, and all three plywoods are impeccably consistent with the original, from the chamfers to the sunray pattern, respecting the original design at a 1:1 ratio. This not only surpasses all Daytona replicas on the market but is also the only replica that can match the original.

More detailed details are as follows:

High Simulation: Clean Factory ensures that the replica watch is highly similar to the original Rolex by strictly restoring the materials and details.

High-quality materials and craftsmanship: The replica watch uses the same 18K gold, Cerachrom ceramic, and mother-of-pearl as the original to ensure that the visual and tactile experience is close to the original.

Precision Movement: The replica Rolex Caliber 4130 movement maintains the

appearance and functions of the original and provides accurate timing functions.

Details: The details on the dial, such as the design of the gold hands, Arabic numerals, subdials, and ceramic bezel, are very close to the original Rolex.

Suitable for daily wear: The high degree of simulation, comfortable rubber strap, and high-end materials make it suitable for daily wear while showing luxury taste.

Specification

Features	
Brand	Rolex
Model	Cosmograph Daytona
Serial Number	116518LN-0037
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal. 4130 Automatic Movement
Case Size	40mm
Case Material	The case is made of 18K yellow gold with a bright golden luster, providing a noble appearance and corrosion resistance.
Hands and Markers	The 18K yellow gold-plated hands and Arabic numerals, both coated with Chromalight luminescent coating, provide a long-lasting blue luminescent effect, making it easy to read the time in low-light conditions.
Bezel	Fixed black ceramic bezel with an engraved tachymeter scale for precise speed measurement. The polished bezel enhances the overall elegant look of the watch.
Crystal	Scratch-resistant sapphire crystal with anti-reflective coating, offering clear visibility while protecting the dial from daily wear. The crystal maintains the watch’s clarity, even under challenging lighting conditions.
Dial	The Mother of Pearl dial showcases a mesmerizing iridescent shine that changes in light, enhancing its visual appeal. Contrasting black subdials add depth and make for easy readability. Luminous hands and markers ensure clear visibility even in low-light

Bracelet

Type: 904L stainless steel and 18K yellow gold Oyster bracelet, combining durability with comfort. Equipped with an Oysterlock folding clasp for a secure, adjustable fit. Polished finish offers a refined and cohesive look that complements the watch's over
