Short Description

This is a gold watch, a replica of the Rolex Explorer M116508-0003 released by Clean Factory. The replica watch is available with a gold dial and is equipped with a customized 4130 movement, with excellent quality and noble temperament.

Description

Friends who like gold watches should pay attention to this replica Rolex Cosmograph Daytona M116508-0003 watch from Clean Factory. The whole body is gold. It can be said to be a very atmospheric and noble gold watch. The gloss is great, the workmanship is excellent, and it is almost a one-to-one restoration of the original. Gold watches give people a sense of stability and stabilize your aura, which is an invisible power.

This replica Rolex Daytona watch from Clean Factory is made of 904L material, equipped with a 4130 movement, AR strap, clean dial/special edition, clean ceramic bezel, and polished original hands, with a thickness of 12.2-12.3 inches.

This watch has an impeccable enamel black dial with minimal color difference. The three-layer dial is carefully assembled, and each component is electroplated. The bezel uses a precisely matched black oil seal to present the same matte effect as the original.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is consistent with the original, and the height of the ceramic ring protruding from the glass is consistent with the original. The ceramic ring is rounded and more three-dimensional, the font is clear, and the edge of the ceramic ring is slightly rounded.

The watch is equipped with a new customized Rolex-exclusive Cal. 4130 automatic winding movement, and the thickness is consistent with the original. All functions are 100% realized, and it is equipped with an unprecedented customized KIF shock absorber. The entire assembly process follows the design of the original Cal.4130 movement. The three splints from chamfers to sunburst patterns are perfectly echoed with the original, respecting the original design 1:1. This not only surpasses all Daytona series imitations on the market but is also the only replica that can compare with the original.

The luminous filling height is moderate, the brightness is good, the font is printed in three dimensions, and the size of the small black circle is consistent with the original.

The strap or case fits seamlessly. The top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap/case and the watch head are concave, which is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116508-0003
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
Hands and Markers	Black-edge hands and hour markers precisely replicate the design and shape of the original
Bezel	The 18k yellow gold bezel is engraved with a tachymeter scale, allowing users to measure speed based on time and distance. This functional feature blends seamlessly with the luxurious design of the watch, making it both a stylish and practical timepiece.

Crystal	A high-quality, scratch-resistant sapphire crystal protects the gold dial, ensuring durability and clarity. The crystal is designed to provide a clear view of the dial while resisting scratches, maintaining the watch's pristine appearance over time.
Dial	The sunburst gold dial is the focal point of this timepiece, featuring a radiant, rich hue that contrasts elegantly with the black subdials positioned at 3, 6, and 9 o'clock. This design enhances both the aesthetic appeal and legibility of the dial. Lumin
Bracelet	The 18k yellow gold Oyster bracelet complements the case beautifully, with a mix of polished and brushed links. The bracelet offers both elegance and durability, with an Oysterlock clasp ensuring a secure fit on the wrist. The design enhances the overall
