Short Description

Let's explore the world of replica watches together. Clean Factory has released the Rolex Daytona 116589 replica watch. The replica watch is available with a blue dial and is equipped with a customized 4130 movement. It is exquisite and stylish with extraordinary quality.

Description

Come pay attention to this Rolex Cosmograph Daytona 116589 replica watch launched by Clean Factory. This replica watch has a blue dial and a dark gray rubber strap. Elegant and beautiful, the color matching is very good. The dial is like a sapphire, crystal clear, and the gloss is very good. It is not pure blue but has a special texture. It exudes a mysterious power, and wearing it will also make you feel different.

This watch has an impeccable enamel black dial with minimal color difference. Each part of the carefully assembled three-layer dial is electroplated. The bezel uses a precisely matched black oil seal to present a matte effect consistent with the original.

This replica Rolex Daytona watch from Clean Factory is made of 904L material, equipped with a 4130 movement, AR strap, clean dial/special edition, clean ceramic

bezel, and polished original hands, with a thickness of 12.2-12.3 inches.

The watch is equipped with a new customized Rolex-exclusive Cal.4130 automatic winding movement, and its thickness is consistent with the original. All functions are 100% accurate and equipped with an unprecedented customized KIF shock absorber. The entire assembly process follows the design of the original Cal.4130 movement. The three splints from chamfers to sunburst patterns are perfectly echoed with the original, respecting the original design 1:1. This not only surpasses all Daytona series imitations on the market but is also the only replica that can compare with the original.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is consistent with the original, and the height of the ceramic ring protruding from the glass is consistent with the original. The ceramic ring is rounder and more three-dimensional, the font is clear, and the edge of the ceramic ring is slightly rounded.

The luminous filling height is moderate, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap/case fits seamlessly. The top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap/case is concave with the watch head, which is consistent with the original.

Clean Factory brand new built-in memory steel sheet and fluororubber strap

Specification
