Price: ~~\$999.00~~ \$789.00

Short Description

Thanks for the support of my friends. Here I recommend the Rolex Daytona M116506-0002 replica watch released by Clean Factory. The replica watch has an ice blue dial to choose from and is equipped with a customized 4130 movement. It has a beautiful and fashionable appearance, excellent texture, and fresh design.

Description

The new replica Rolex Cosmograph Daytona M116506-0002 panda dial watch is produced by the factory. This watch has a fresh light blue dial and a metal strap. At first glance, it feels like a summer sea breeze blowing, refreshing and pleasant. Light blue, light mood, quiet afternoon—such a peaceful picture comes to mind. This watch is unique and lovely, with exquisite workmanship and excellent quality.

This new replica Rolex Ice Blue Diamond Daytona watch has a flawless enamel black dial with minimal color difference. Each component of the carefully assembled three-layer dial is electroplated. The bezel uses a precisely matched black oil seal to present a matte effect consistent with the original.

This replica Rolex Daytona watch from Clean Factory is made of 904L material,

equipped with a 4130 movement, AR strap, clean dial/special edition, clean ceramic bezel, and polished original hands, with a thickness of 12.2-12.3 inches.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is consistent with the original, and the height of the ceramic ring protruding from the glass is consistent with the original. The ceramic ring is rounded and more three-dimensional, the font is clear, and the edge of the ceramic ring is slightly rounded.

The watch is equipped with a new customized Rolex-exclusive Cal. 4130 automatic winding movement, and the thickness is consistent with the original. All functions are 100% accurate and equipped with an unprecedented customized KIF shock absorber. The overall assembly follows the design of the original Cal.4130 movement, and the three splints from chamfering to sunburst decoration are perfectly echoed with the original, respecting the original design 1:1. This not only surpasses all Daytona replicas on the market but is also the only replica that can compare to the original.

The luminous fill height is moderate, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap/case fits seamlessly. The top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap/case is concave with the watch head, which is consistent with the original.

Specification
