Short Description

Thank you for your continued attention. Come and appreciate this Rolex Daytona M116509-0071 replica watch released by Clean Factory. The replica watch is available with a blue dial and is equipped with a customized 4130 movement. The extraordinary craftsmanship creates an exquisite replica to satisfy your desire to easily own it.

Description

Let's step into the wonderful world of replica watches. This is the new Rolex Cosmograph Daytona M116509-0071 panda dial watch launched by Clean Factory. The dial of this watch is blue and matched with a metal strap. A very gentlemanly watch; the unique temperament of blue comes to your face. With an elegant, gentle, and intellectual temperament, it is a rare and exquisite replica watch.

This watch has an impeccable enamel black dial with minimal color difference. The three-layer dial is carefully assembled, and each component is electroplated. The bezel uses a precisely matched black oil seal to present a matte effect consistent with the original.

This replica Rolex Daytona watch from Clean Factory is made of 904L material, equipped with a 4130 movement, AR strap, clean dial/special edition, clean ceramic

bezel, and polished original hands, with a thickness of 12.2-12.3 inches.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is consistent with the original, and the height of the ceramic ring protruding from the glass is consistent with the original. The ceramic ring is rounded and more three-dimensional, the font is clear, and the edge of the ceramic ring is slightly rounded.

The luminous filling height is moderate, the brightness is good, the font printing is three-dimensional, and the size of the small black circle is consistent with the original.

The strap/case fits seamlessly. The top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap/case is concave with the watch head, which is consistent with the original.

The watch is equipped with a new customized Rolex-exclusive Cal. 4130 automatic winding movement, and the thickness is consistent with the original. All functions are 100% accurate and equipped with an unprecedented customized KIF shock absorber. The overall assembly follows the design of the original Cal.4130 movement, and the three splints from chamfering to sunburst decoration are perfectly echoed with the original, respecting the original design 1:1. This not only surpasses all Daytona replicas on the market but is also the only replica that can rival the original.

Specification
