Short Description

Beautiful things should be shared with everyone. Let's take a look at this Rolex Explorer M116508-0011 replica watch released by Clean Factory. The replica watch is available with a rose gold dial and is equipped with a customized 4130 movement. It is elegant and noble, with an extraordinary temperament.

Description

This is a factory clearance VIP upgraded dial Rolex Cosmograph Daytona M116508-0011 panda dial watch. The dial color is rose gold, with a gold metal strap and a dial scale inlaid with diamonds. Rose gold is paired with gold, beautiful and noble. Coupled with the glossiness created by exquisite craftsmanship, the texture of the whole watch is very good. Unique and charming charm, affectionate style.

Factory clearance VIP customers can upgrade the replacement dial to the top replica watch—the Rolex Daytona M116508-0011 series—which is currently not in mass production.

This watch has an impeccable enamel black dial with minimal color difference. The three-layer dial is carefully assembled, and each part is electroplated. The bezel is filled with a

precisely matched black oily filling, presenting a matte effect consistent with the original.

The watch is equipped with a new customized Rolex-exclusive Cal. 4130 automatic winding movement, and the thickness is consistent with the original. All functions are 100% accurate and equipped with unprecedented custom KIF shock absorbers. The overall assembly follows the design of the original Cal. 4130. The 4130 movement and the three-layer plywood, from chamfers to sunburst patterns, perfectly echo the original, maintaining 1:1 respect for the original design. This not only surpasses all Daytona series imitations on the market but is also the only replica that can rival the original.

Unprecedented use of custom KIF shock absorbers, known for their high-end positioning. Due to cost constraints, the development of replica movements usually avoids the use of such shock absorbers, but Factory C spared no expense to ensure their use. The entire movement is based on the original Cal. 4130 and follows the design of the original; from chamfers to sunburst patterns, the three-layer plywood respects the original design in a perfect 1:1 ratio.

Clean Factory replica The Rolex Daytona watch is made of 904L material, equipped with 4130 movement, an AR strap, a clean dial/unique version, a clean ceramic bezel, original polished hands, and a thickness of 12.2-12.3 inches.

The seam between the glass and the case is completely transparent, with no obvious white edge. The curvature of the glass edge is consistent with the original, and the height of the ceramic bezel protruding from the glass is consistent with the original. The ceramic bezel is rounded and three-dimensional, the font is clean and neat, and the edges are slightly rounded.

The luminous filling height is moderate, the brightness is good, the font printing has a strong three-dimensional sense, and the size of the small black circle is consistent with the original.

The strap/case fits seamlessly. The top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap/case is concave with the watch head, which is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116508-0011
Gender	Man

Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
Hands and Markers	Black-edge hands and hour markers precisely replicate the design and shape of the original
Bezel	The bezel is crafted from 18k gold and engraved with a tachymeter scale, allowing for precise measurement of speed. The gold bezel is both functional and luxurious, complementing the overall aesthetic of the watch while providing durability against scratches
Crystal	The scratch-resistant sapphire crystal ensures that the dial remains clear and protected from everyday wear. The high-quality crystal allows for a full view of the Black Panda dial, preserving its clarity and shine for years.
Dial	The Black Panda dial is the standout feature of this timepiece, with its contrasting subdials and luminous hour markers. The panda design, known for its clear and striking aesthetics, features a black dial with white subdials, enhancing both the legibility
Bracelet	The watch comes with a solid 18k gold Oyster bracelet, which blends comfort with security. The bracelet is polished to a high shine with brushed links, ensuring a sophisticated yet sporty appearance. The Oysterlock clasp ensures a secure fit and easy adjustment
