Price: ~~\$1,199.00~~ \$799.00

Short Description

Clean Factory has put a lot of effort into creating and recently released the Rolex Daytona M116505-0017 replica watch. The replica watch is available with a rose gold dial and is equipped with a customized 4130 movement. It is beautiful, elegant and fashionable, and the internal details are well processed.

Description

This issue presents you with the Clean Factory replica Rolex Daytona M116505-0017 watch. The dial of this watch is rose gold and is paired with a metal strap. The dial is mirror-smooth and textured. The overall design is stylish and beautiful, and the internal quality is excellent. Rose gold is elegant and has a unique beauty different from pure gold. It is unique to wear and has a different appeal.

Explore the best 1:1 replica watch from the Clean Factory—the Rolex Daytona series. This watch has an impeccable enamel black dial with minimal color difference. The three-layer dial is carefully assembled, and each part is electroplated. The bezel uses a precisely matched black oil seal to present the same matte effect as the original.

The watch is equipped with a new customized Rolex-exclusive Cal.4130 automatic

winding movement with the same thickness as the original. All functions are 100% accurate and equipped with an unprecedented customized KIF shock absorber. The entire assembly process follows the design of the original Cal.4130 movement. The three plywoods, from chamfers to sunburst patterns, perfectly echo the original, maintaining 1:1 respect for the original design. This not only surpasses all Daytona replicas on the market but is also the only replica that can compare with the original.

This replica Rolex Daytona watch from Clean Factory is made of 904L material, equipped with a 4130 movement, AR strap, clean dial/special edition, clean ceramic bezel, and polished original hands, with a thickness of 12.2-12.3 inches.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is consistent with the original, and the height of the ceramic ring protruding from the glass is consistent with the original. The ceramic ring is rounded and more three-dimensional, the font is clear, and the edge of the ceramic ring is slightly rounded.

The luminous fill height is moderate, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case fits seamlessly. The top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap/case is concave with the watch head, which is consistent with the original.

Specification
