Short Description

This issue recommends the Rolex Daytona M116518LN-0042 replica watch released by Clean Factory. The replica watch has a champagne dial to choose from and is equipped with a customized 4130 movement. It is finely crafted and exquisitely designed.

Description

This is a replica Rolex Daytona M116518LN-0042 watch from Clean Factory, which is sure to produce quality watches. The dial is champagne and paired with a dark grey rubber strap. The whole watch is very beautiful, with gorgeous colors. The design of the watch is classic and versatile, and it is exquisite. The dial has a very good brightness, and it is made one-to-one with the original. We aim to follow every detail of the original and do our best to create a top-level replica watch for everyone.

Discover Clean Factory's new champagne sunburst Rolex Cosmograph Daytona. Clean Factory's top-level replica Rolex Daytona series watches

The impeccable black enamel dial has zero color deviation, and each component of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease to present a matte effect that is exactly the same as the original.

The watch is equipped with a new Cal.4130 automatic movement exclusively customized by Rolex, and the thickness is consistent with the original. Each function is 100% realized, equipped with an unprecedented custom KIF shock absorber. The entire assembly is designed with the original Cal. 4130 movement, and all three plywoods are impeccably consistent with the original, from chamfers to sunray patterns, respecting the original design at a 1:1 ratio. This not only surpasses all Daytona replicas on the market but is also the only replica that can match the original.

Clean Factory's fake Rolex Daytona watch uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edge. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The luminous filling is of moderate height and good brightness, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.
