Short Description

Welcome friends, pay attention to this Rolex Daytona M116503-0003 replica watch released by Clean Factory. The replica watch is available with a gold dial and is equipped with a customized 4130 movement. It is beautiful and exquisite, equipped with powerful power and comfortable to wear.

Description

This is a replica Rolex Daytona M116503-0003 watch launched by Clean Factory. The dial color of this watch is gold, with a metal strap. This replica watch is very exquisite, and it is a gold watch series. Its glossiness is very good, and it feels very textured when held in the hand. Gold, gorgeous. It silently interprets a noble aura. Wearing it, even if you are not confident enough, it will disappear, and the calm belief from the heart will rise silently.

This replica Rolex Daytona watch from Clean Factory is made of 904L material, equipped with 4130 movement, an AR strap, a clean dial/special edition, a clean ceramic ring, and polished original hands, with a thickness of 12.2-12.3 inches.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is consistent with the original, and the height of the ceramic ring protruding from the glass is consistent with the original. The ceramic

ring is rounded and more three-dimensional, with clear fonts and slightly rounded edges.

Rolex Daytona series

This watch has an impeccable enamel black dial with minimal color difference. The three-layer dial is carefully assembled, and each component is electroplated. The bezel uses a precisely matched black oil seal to present a matte effect consistent with the original.

The watch is equipped with a new customized Rolex-exclusive Cal. 4130 automatic winding movement with the same thickness as the original. All functions are 100% realized and equipped with an unprecedented customized KIF shock absorber. The entire assembly process follows the design of the original Cal.4130 movement. The three splints from chamfering to sunburst patterns are perfectly echoed with the original, respecting the original design 1:1. This not only surpasses all Daytona series imitations on the market but is also the only replica that can compare with the original.

The luminous filling height is moderate, the brightness is good, the font printing is three-dimensional, and the size of the small black circle is consistent with the original.

The strap or case fits seamlessly. The top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap/case is concave with the watch head, which is consistent with the original.

Specification

Features	
Brand	Rolex
