Description

41

Explore the new Rolex Daytona from Clean Factory, this replica Rolex M116506-0001 watch. The dial color of this watch is light blue, with a metal strap. It is a very elegant blue, and it feels very comfortable to look at, very summery. A refreshing feeling arises spontaneously, and summer does not need too heavy colors, so light and pleasant, it is just right. It makes people feel happy and comfortable, and the gentle breeze makes people intoxicated.

This replica watch is exclusively purchased from the original Ice Landi, and the mold is opened and the color is adjusted separately, which is very cost-effective.

Because Ice Landi is a special style of PT950, it is not only engraved with words, but also the inside of the buckle is also the only style that uses frosted technology. Attachment: All products on the market are polished buckles. The brown ceramic ring is still colored

separately.

It uses an impeccable enamel black dial with zero color difference. Each component of the carefully assembled three-layer dial is electroplated. The bezel is filled with a precisely matched black oily filling, presenting a matte effect consistent with the original.

The watch is equipped with a new customized Rolex-exclusive Cal.4130 automatic winding movement, with the same thickness as the original. All functions are 100% realized and equipped with an unprecedented customized KIF shock absorber. The entire assembly follows the design of the original Cal.4130 movement, and the three splints from chamfers to sunburst patterns are perfectly echoed with the original, respecting the original design 1:1. This not only surpasses all Daytona series replicas on the market but is also the only replica that can compete with the original.

The Clean Factory replica Rolex Daytona watch is made of 904L material, equipped with a 4130 movement, AR strap, dial/unique edition, clean ceramic ring, original polished hands, and a thickness of 12.2-12.3 mm.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is consistent with the original, and the height of the ceramic ring protruding from the glass is also consistent with the original. The ceramic ring is round and three-dimensional, the font is clean and neat, and the edge is slightly rounded.

The luminous filling height is moderate, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case fits the case seamlessly. The top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the head, which is consistent with the original.

Specification
