Short Description

The highly anticipated Clean Factory recently released the Rolex Explorer M116508-0016 replica watch. The replica watch is available with a black dial and is equipped with a customized 4130 movement. It has a classic style and high quality, making it the first choice for replica watches.

Description

Continuing the journey of exploration, Clean Factory launched the replica Rolex Daytona M116508-0016 watch. The dial of this watch is black and paired with a gold metal strap. This is a gorgeous, beautiful, powerful, and stable replica watch. Friends who like this one have good taste. It is a classic style, and the details are also very well handled. It can be said to be a perfect replica of the same Rolex.

Next, let's focus on the details:

This watch has an impeccable enamel black dial with minimal color difference. The three-layer dial is carefully assembled, and each component is electroplated. The bezel uses a precisely matched black oil seal to present a matte effect consistent with the original.

The watch is equipped with a newly customized Rolex-exclusive Cal.4130 automatic winding movement with the same thickness as the original. All functions are 100%

realized and equipped with an unprecedented customized KIF shock absorber. The entire assembly process follows the design of the genuine Cal.4130 movement. The three plywoods, from chamfers to sunburst patterns, perfectly echo the genuine ones, respecting the original design 1:1. This not only surpasses all Daytona replicas on the market but is also the only replica that can compare with the genuine ones.

This replica Rolex Daytona watch from Clean Factory is made of 904L material, equipped with 4130 movement, an AR strap, a clean dial/special edition, a clean ceramic bezel, and polished original hands, with a thickness of 12.2-12.3 inches.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is consistent with the genuine one, and the height of the ceramic ring protruding from the glass is consistent with the genuine one. The ceramic ring is rounded and more three-dimensional, the font is clear, and the edge of the ceramic ring is slightly rounded.

The luminous fill height is moderate, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the genuine one.

The strap or case fits seamlessly. The top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap/case is concave with the watch head, which is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116508-0016
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
Hands and Markers	Black-edge hands and hour markers precisely replicate the design and shape of the original
Bezel	The polished yellow gold bezel is equipped with a tachymeter scale to measure speed, adding both functionality and elegance to the watch. The bezel’s clean design enhances the overall look of the timepiece, giving it a refined yet sporty appeal.
Crystal	The watch is protected by a scratch-resistant

	sapphire crystal, providing clarity and durability. This crystal enhances the watch's appearance by offering a clear view of the intricate dial and keeping the timepiece in pristine condition over time.
Dial	The bold black dial is contrasted by gold-tone subdials, creating a striking and sophisticated appearance. The subdials display chronograph functions (seconds, minutes, and hours), adding both style and practicality. The luminous hands and markers ensure
Bracelet	The Oyster bracelet is made from 18k yellow gold, ensuring comfort, durability, and a luxurious finish. The bracelet features a combination of brushed and polished links, giving the watch a sophisticated and dynamic look. The bracelet is equipped with an
