Short Description

Welcome to the exquisite world of replica watches, featuring the Rolex GMT-Master II M126713GRNR-0001 replica watch released by Clean Factory. Available with a black dial and equipped with a custom caliber 3285, this replica watch is a classic style, a flawless reproduction that will evoke your love for classics.

Description

This is a replica Rolex GMT-Master II M126713GRNR-0001 watch from Clean Factory. This watch features a black dial and a metal strap. Gold accents in the center and on some details add a vibrant pop of color to the watch. The black and gold complement each other beautifully, creating a strikingly cool look. The classic design and beautiful color combination create a dazzling, alluring look.

More details are as follows:

The ceramic bezel of this clean-cut Rolex GMT-Master II features a rounded 12 o'clock triangle, top and bottom corners, and sharp corners, all perfectly aligned with the original.

When it comes to fonts, depth is only one aspect. The original process required the base of the font to be perpendicular to the main body of the font. This effect can only be achieved through integrated molding, but laser marking can result in issues such as

beveled surfaces, rough shadows, and collapsed edges.

The font depth is consistent with the original, at 0.13 mm. In addition, the edge of the lettering has been polished. The plating color has also been digitally adjusted. Most products on the market are made of pure gold, so the authentic one will have a slight reddish tint. This makes it visually much more comfortable to wear.

The entire case is made of 904L material, perfectly recreating the overall GMT shape and refining the feel of the GMT's rotation. The crown and handle also feature an embossed crown. It is equipped with the same caliber 3285 as the authentic one. The caseback is also polished and brushed, consistent with the authentic one, and the bottom of the case is also brushed. The fit between the caseback and the case is nearly identical. You can compare the gap between the handle and the case yourself.

The slight bulge at the end of the "R" in the inner shadow has been corrected across the entire series. If there is one point of criticism, it's the inner shadow. The shadow is not as detailed as before, due to the limitations of domestic laser technology and equipment.

Specification
