Price: ~~\$1,099.00~~ \$789.00

Short Description

Good things should be shared happily, and here is the Clean Factory replica Rolex Cosmograph Daytona 116519-L Silver Panda Plate, which is a replica dedicated to reproducing the classic Rolex chronograph watch. This watch is named "Panda Plate" because of its eye-catching silver dial with black sub-dial design.

Description

Watches, like a silent traveler, silently record the passage of time. Who can read the story behind each watch? It's you at this moment. Let me introduce this special replica watch to you. The three-layer dial of this replica watch is carefully assembled, and each part is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

The finishing touch is the black sub-dial on the dial, which looks like a panda's eyes, becoming the unique feature of the panda dial. Special feelings are given to special people. May this unique feeling ring your heart and become a different kind of companion, worn on your body. Like a special partner, solid, permanent, and trustworthy.

The Rolex Daytona replica watch from Clean Factory is made of 904L material, 4130

movement, AR strap, simple dial/unique version, simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The height of the luminous filling is moderate, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and there is a slight dent at the tail. The bottom of the strap or case is concave with the head, which is consistent with the original.

The watch is equipped with a new Cal.4130 automatic winding movement customized by Rolex, and the thickness is consistent with the original. Every function is 100% realized, equipped with an unprecedented customized KIF shock absorber. The entire assembly is designed with the original Cal. 4130 movement, and all three splints are impeccably consistent with the original, from chamfers to sunray patterns, reaching a 1:1 ratio, respecting the original design. This not only surpasses all Daytona replicas on the market but is also the only replica that can match the original.

Features of the replica

High Simulation: Clean Factory simulates the original Rolex watch to the greatest extent in design and details, including the appearance of the case, dial, and movement.

High-quality materials: 18K white gold, Cerachrom ceramic, and a high-quality rubber strap are used to ensure that the replica watch is close to the original in both a visual and tactile sense.

Classic Design: The silver panda dial design creates a stylish and classic appearance with a strong contrast of silver and black, suitable for wearing on all occasions.

Precise Movement: The replica Caliber 4130 movement provides precise timing performance and durability, matching the functions of the original movement.

Comfortable Wearing: The black rubber strap combines durability and comfort and is paired with an Oysterlock folding safety buckle to provide a good wearing experience.

Specification

Features	
Brand	Rolex
Model	Cosmograph Daytona
Serial Number	116519-L
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal. 4130 Automatic Movement
Case Size	40mm
Case Material	Crafted in 18K white gold, the surface is finely polished for a noble metallic luster and corrosion resistance.
Hands and Markers	The 18-carat white gold-plated hands and three-dimensional hour-markers are coated with Chromalight luminescent material, which emits blue luminescence in low-light conditions.
Bezel	The polished stainless steel bezel of the Daytona 116519-L is clean and sleek, with a tachymeter scale to measure speed, adding a practical and sporty touch to the watch. The bezel's design complements the overall aesthetic, balancing elegance with high-p
Crystal	The watch features a scratch-resistant sapphire crystal, providing clarity and protection. The crystal enhances the dial's appearance, ensuring that it remains free from damage while offering a clear view of the intricately designed Panda dial.
Dial	The silver dial features black subdials, creating the iconic Panda dial look. The high-contrast design enhances readability and adds a sporty aesthetic to the watch. The subdials display chronograph functions (seconds, minutes, and hours), making the watc
Bracelet	The Oyster bracelet is crafted from high-quality stainless steel, offering both comfort and durability. It features a combination of brushed and polished links that create a refined yet sporty look. The bracelet is equipped with the Oysterlock clasp, ensu
