Short Description

This issue brings you the masterpiece of Clean Factory, the replica Rolex Cosmograph Daytona M116503-0007 watch. The replica watch has a silver-gray dial to choose from, with beautiful color matching. Equipped with a customized 4130 movement, the dial is equipped with three round sub-dials to meet your different timing needs, and the details are thoughtful. The metal strap is matched with excellent glossiness. The fashionable atmosphere instantly hits you.

Description

Thanks for visiting, and continue to explore the products of the Clean Factory. This Rolex Daytona M116503-0007 mother-of-pearl dial replica watch. The dial color is silver-gray, with a metal strap. The strap and other details are decorated with gold to add embellishment and enhance the overall beauty. Against the backdrop of excellent glossiness, a low-key sense of luxury arises spontaneously. Its charm is irresistible, like the waves on the coast, slowly surging into your heart.

The three-layer dial carefully assembled in this replica watch uses an impeccable enamel black dial with zero color difference, and each component is electroplated. The bezel is filled with precisely matched black oil to present the same matte effect as the original.

The seam between the glass and the case is completely transparent, and no white edges

can be seen. The curvature of the glass edge is consistent with the original, and the height of the ceramic ring protruding from the glass is consistent with the original. The ceramic ring has a stronger sense of roundness, the font is clean, and the edge of the ceramic ring is slightly rounded.

The watch is equipped with a new customized Rolex-exclusive Cal.4130 automatic winding movement, which is consistent with the thickness of the original. Each function is 100% realized, equipped with an unprecedented customized KIF shock absorber. The entire assembly follows the design of the original Cal. 4130 movement, and all three plates perfectly reflect the original from the chamfer to the sunburst pattern, maintaining 1:1 respect for the original design. This not only surpasses all the replicas of the Daytona series on the market but also is the only replica that can be compared with the original.

Clean Factory's replica Rolex Daytona watch uses 904L material, 4130 movement, an AR strap, a clean dial/unique version, a clean ceramic bezel, and polished factory hands, with a thickness of 12.2-12.3.

The luminous fill height is moderate, and the brightness is good; the font printing is three-dimensional, and the size of the small black circle is consistent with the original.

The strap or case fits seamlessly, the top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116503-0007
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
Hands and Markers	Black-edge hands and hour markers precisely replicate the design and shape of the original
Bezel	Fixed 18K yellow gold bezel with an engraved tachymeter scale, a hallmark of the Daytona design. The polished bezel enhances the luxurious

	look and feel of the timepiece.
Crystal	Scratch-resistant sapphire crystal with an anti-reflective coating for reduced glare and enhanced visibility. Protects the Mother of Pearl dial from daily wear and ensures clarity.
Dial	The stunning Mother of Pearl dial features a radiant finish that shifts in color and adds a touch of luxury to the timepiece. Black subdials provide excellent contrast for readability and precision. Luminous hands and markers ensure visibility in low-light
Bracelet	Type: 904L stainless steel and 18K yellow gold Oyster bracelet for superior comfort and durability. Equipped with an Oysterlock folding clasp, ensuring a secure, adjustable fit. The elegant bracelet offers a perfect blend of practicality and style.
