

# Clean Factory Rolex Cosmograph Daytona 116528 Gold Watch

**Brand:** Clean Factory

**Product Code:** 116528

**Availability:** In Stock

**Weight:** 0.00kg

**Dimensions:** 0.00cm x 0.00cm x 0.00cm

**Price:** ~~\$1,200.00~~ \$800.00

## Short Description

Let's explore the Rolex Daytona 116528 replica watch released by Clean Factory. This replica watch is unique in gold color, equipped with a customized 4130 movement and a dark gray rubber strap. It has a delicate and beautiful appearance and excellent performance.

## Description

Next, let's continue to introduce this Clean Factory Rolex Cosmograph Daytona 116528 Gold watch. The first thing that catches your eye is its eye-catching gold appearance. The classic three-sub-dial design meets the needs of personalization and practicality. The metal dial is matched with a dark gray rubber strap to create a harmonious aesthetic. Gold, dazzling and eye-catching, is the color of the royal family. Dark gray, calm and atmospheric, is the favorite color of successful people. The two colors complement each other and interpret different styles.

This replica watch also has an impeccable black enamel dial with zero color deviation. Each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

The watch is equipped with a new Cal.4130 automatic winding movement exclusively customized by Rolex, and the thickness is consistent with the original. Each function is 100% realized and equipped with an unprecedented customized KIF shock absorber. The entire assembly is designed with the original Cal. 4130 movement, and all three plywoods are impeccably consistent with the original, from the chamfers to the sunray pattern, respecting the original design at a 1:1 ratio. This not only surpasses all Daytona replicas on the market but is also the only replica that can match the original.

Clean Factory's Rolex Daytona replica watch uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edge. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

Clean Factory's new internal memory steel and fluoro rubber strap

The bottom of the strap/case is concave with the watch head, which is consistent with the original.

Unprecedented use of custom KIF shock absorbers, which are known for their high-end positioning. Usually, due to cost constraints, the development of replica movements will avoid the use of such shock absorbers, but C Factory spared no effort to ensure the use of such shock absorbers. The entire movement is based on the authentic Cal. The entire movement is based on the authentic movement 4130, and the design of the authentic is followed. From the chamfers to the sun pattern, all three layers respect the original design in a perfect 1:1 ratio.

The luminous filling is moderately high, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the authentic.
