Short Description

I would like to recommend this Rolex Daytona M126515-0002 replica watch released by Clean Factory. The replica watch is available with a black dial and is equipped with a customized 4131 movement. It has a fashionable and sporty style and exudes a casual and charming temperament.

Description

Let's continue to focus on the replica Rolex Daytona M126515-0002 watch produced by Clean Factory. The dial of this watch is black, the small disc is rose gold, and it is paired with a dark gray rubber strap. Excellent gloss and strong texture are the highlights of this watch. It has a charming appearance and excellent quality. It can handle daily casual or formal occasions with ease. The calm and atmospheric style is attractive at first sight.

The Rolex Cosmograph Daytona has always been a model of luxury chronographs, and the latest rose gold M126515-0002 watch has taken it to the next level with its elegant, upgraded design and new 4131 movement. This rose gold Rolex Daytona replica watch launched by Clean Factory faithfully restores the aesthetics and craftsmanship of the original watch, making it a must-have for collectors and watch enthusiasts.

1. The charm of Everose gold

This new rose gold Rolex Daytona watch is made of Everose gold, a material developed exclusively by Rolex. This self-produced alloy is known for its durability and unique warm tones. The black Cerachrom ceramic bezel contrasts with the watch, highlighting its luxurious and modern appearance, which combines fashion and durability. The upgraded rose gold bracelet also improves wearing comfort while inheriting the classic fusion of sport and sophistication of Daytona.

2. Exquisite black dial, bold details

The M126515-0002 Daytona watch features a deep black dial with Everose gold hour markers and hands covered with luminous coating, which is more luxurious and easy to read even in low-light environments. The three chronograph function sub-dials are carefully designed, with a balanced layout and easy operation. Each sub-dial is decorated with rose gold for a more elegant temperament. Clean Factory's attention to detail is fully demonstrated here, and the depth and polished edges of the dial are in line with the high standards of the original.

3. Upgraded 4131 movement: precision and durability redefined

A highlight of this new Daytona watch is its upgraded Rolex 4131 movement. Based on the previous generation 4130 movement, the new 4131 movement improves power efficiency, optimizes energy transmission, and is equipped with a Rolex Parachrom hairspring, which has excellent anti-magnetic and anti-shock performance. The movement's 72-hour power reserve and Chronergy escapement system ensure energy efficiency and stability, making it a leap in precision and durability.

Main features of the 4131 movement

Extended power reserve: increased from 70 hours to 72 hours to ensure long-lasting performance.

Enhanced shock resistance: With an improved Parachrom hairspring, the movement can maintain accurate time even when impacted.

Energy efficiency: The Chronergy escapement system reduces friction while improving efficiency, ensuring long-term stable performance.

4. Practical and luxurious strap design

The new Clean Factory rose gold Rolex Daytona watch is paired with Rolex's iconic

Oysterflex strap, which improves the wearing comfort and durability of the watch. The strap uses a titanium-nickel alloy metal core wrapped in black elastomer, which combines strength and flexibility. This innovative design is exquisite in appearance and comfortable to wear, perfect for daily wear or attending various occasions.

5. Excellent craftsmanship: Clean Factory's difference

Clean Factory's exquisite craftsmanship shines on this rose gold Daytona replica watch. From the dial and movement to the material of the case and bracelet, every detail is exactly the same as the original watch. The pursuit of excellence in details makes this watch not only a practical accessory but also a treasure with great collectible value.
