Description

Clean Factory Rolex Yacht Master M126621-0001 Brown Dial

Clean Factory shockingly released the replica Rolex Yacht-Master M126621-0002 watch with a dial size of 40 mm. The dial of this watch is brown, with a metal strap, and the outer ring of the dial and the strap are designed to incorporate rose gold color. The uncommon brown dial brings a unique sense of fashion, full of a hint of retro charm. The appeal of the brand often lies in this: not sticking to classics, trying new beauty.

This model uses a stunning rose gold plating, which is considered to be the most accurate color on the market. The black dial of this model is exactly the same as the previously released 126655 40mm full rose gold model, and we have conducted a thorough authenticity comparison on them. Therefore, we will not repeat the authenticity comparison in this version. Instead, we will focus on the authenticity comparison of the

new coffee dial.

Left/right comparison: GEN = authentic; clean = Clean Factory's product.

Due to the lighting conditions in the softbox, the coffee dial may look slightly different. But in natural light, the similarity reaches more than 95%. We will provide natural light comparison photos for reference.

In the coffee-colored dial comparison, the Clean Factory version is slightly lighter than the original. It should be noted that the characteristic of the sun-grained dial is that the color changes under different lighting conditions. In terms of RGB color values, the overall deviation is small. Clean Factory uses the same PVD plating technology as the original for all radiant dials, including Submariner, various GMT models, and the current Yacht series. This ensures consistent tones from batch to batch. In addition, the thin coating makes the sun-grain pattern on the dial clearly visible, but the production cost is higher.

For the Yacht 40mm Series 126621, the bezel is made of brass material, plated with PVD rose gold and coated with an anti-fingerprint film. In this version, we upgraded the bezel material to stainless steel, which has a higher hardness compared to standard brass. We have invested a lot of effort in processing and cost optimization to provide the best possible quality.

Thank you for choosing the Clean Factory Watches Rolex Yacht Master 40mm Series 126621 Rose Gold. We are committed to providing excellent products and services to ensure you are utterly satisfied with your shopping experience.

Specification

Features	
Brand	Rolex
Model	Yacht Master
