Availability: In Stock
Weight: 0.00kg
Dimensions: 0.00cm x 0.00cm x 0.00cm

Price: ~~\$899.00~~ \$659.00

Short Description

Thanks for your attention, I would like to recommend a replica Rolex GMT-Master II M126710BLRO watch released by Clean Factory. This watch is available in black and is equipped with a customized 3285 movement. The appearance design is sporty and fashionable.

Description

Let's take a look at this clearance replica Rolex GMT Master II M126710BLRO watch from the Coke Bezel series. This watch features a black dial and a metal strap. The dial's outer ring features blue and red accents on the top and bottom. It exudes a fashionable, youthful vibe, a dynamic energy, and a youthful spirit. It feels like walking towards an unknown future with youthful steps. It offers more than just visual charm; it also resonates with the soul and offers a silent power.

The clearance factory presents a replica GMT Master II watch equipped with the Dandong 3285 movement. This is an iterative upgrade from the previous-generation 3186 movement. From the small calendar function to the case and strap details, it has been continuously improved. The addition of the exclusive 3285 Dandong movement brings even more surprises.

The highlights of this update include

The movement has been upgraded from 3186 to 3285, increasing the power reserve from 42 hours to 72 hours. The movement's appearance and timing direction are identical to the authentic 3285.

The bezel's feel has been continuously refined to meet customer requirements for a smoother, more comfortable feel.

The entire strap has been polished, especially the textured crown on the buckle. While maintaining a smooth, three-dimensional appearance, the texture creates a striking effect. A set of comparison images will be released later to showcase this important milestone update. This crown took nearly two years to develop and is now incorporated into the entire Clean Factory collection.

The ceramic bezel of this replica watch features rounded corners at the 12 o'clock triangle, top corners, and bottom corners, and sharp corners, consistent with the original.

When it comes to fonts, depth is only one aspect. The original process required the base of the font to be perpendicular to the body of the font at a 90-degree angle. This effect can only be achieved through integrated molding, while laser printing can result in a series of issues such as bevels, rough shadows, and broken edges.

The font depth is consistent with the original, sinking 0.13 mm. Additionally, a corner of the font edge has been polished, and the electroplating color has been digitally adjusted. While most models on the market are pure gold, the original has a slight reddish tint. Visually, it's much more pleasing.

The watch's case is entirely constructed of 904L stainless steel, perfectly recreating the GMT case shape and revising the GMT's rotating feel. The crown and handle also feature an embossed crown. It uses the same caliber 3285 movement as the original. The caseback is also polished and brushed, consistent with the original, while the bottom of the case is brushed. The fit between the caseback and the case is nearly identical. The gap between the handle and the case can be compared.

In the inner shadow, the tail of the letter "R" is slightly protruding, as is the case throughout the series. If there is a real flaw, it's the inner shadow. The shadow isn't as detailed as before, due to the limitations of domestic laser technology and equipment.

Specification

Features

Brand	Rolex
Model	GMT Master II
Serial Number	M126710BLRO-001
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.3285 Automatic Movement
