Short Description

Welcome, friends, to pay attention to the Rolex GMT-Master II M126719BLRO-0003 replica watch released by Clean Factory. The replica watch has a blue dial and is equipped with a customized 3186 movement. This watch has a special appearance and a sense of design. It is quite good-looking and recommended to everyone.

Description

Qing Factory launched the replica Rolex GMT Master II M126719blro-0003 blue dial series. This watch has a blue dial and a metal strap. It is particularly noteworthy that the outer ring of the dial is designed with blue and red. A lively and enthusiastic atmosphere follows. The strap part also has a little sense of design, which can be seen in detail. The color matching of the dial is the highlight of the whole watch, the collision of blue and red. Sometimes it is a rare experience in life to not follow the rules.

Let's take a closer look at the advantages of other details:

The GMT Master ceramic ring, 12 o'clock triangle part, top corner part, bottom corner part, and sharp corner position are all rounded, which is consistent with the original text.

Speaking of fonts, depth is only one aspect. The original process is that the bottom of the font is 90 degrees vertical to the font body. To achieve this effect, it can only be formed

by mold integration, and laser typing will have a series of problems, such as bevels, rough shadows, and edge collapse.

The font depth is consistent with the genuine product, sinking 0.13 mm. In addition, one corner of the front edge is polished, and the electroplating color has also been digitally adjusted. Most of the ones on the market are pure gold, and the genuine ones will be slightly reddish, which will be much more comfortable visually.

The appearance of the case is all 904L, which perfectly restores the overall shell shape of GMT and corrects the rotation feel of GMT. The crown handle also presents the effect of an embossed crown. The same 3186 movement as the genuine product is used. The bottom cover is also consistent with the genuine product, polished and brushed, and the bottom of the case is brushed. The fit between the bottom cover and the case is almost the same. The gap between the handle and the case can be compared by yourself.

In terms of inner shadow, the tail of the letter "R" corrects the entire series and is slightly protruding. If you really want to find fault, it is the inner shadow part. The shadow is not as delicate as before, limited by domestic laser technology and equipment.

Specification

Features	
Brand	Rolex
Model	GMT Master II
Serial Number	M126719BLRO-0003
Gender	Man
Movement Type	Automatic Movement
Movement Model	cal. 3186 Automatic Movement
