Price: ~~\$899.00~~ \$609.00

Short Description

Welcome everyone, and I would like to recommend the Rolex GMT-Master II M126710BLNR replica watch released by Clean Factory. The replica watch is available with a black dial and is of excellent quality, a perfect replica of the classic original.

Description

Clean Factory Rolex GMT Master II M126710BLNR-0003 cal.3285

I recommend this clean factory replica Rolex GMT Master II M126710BLNR-0003 Batman 3285 series watch. This replica watch features a black dial, a metal strap, and a black and blue dial bezel design, creating a beautiful and unique look. It exudes a stunning luster from every angle and boasts premium quality and meticulous craftsmanship, ensuring exceptional quality. The attention to detail in every aspect of this watch is exceptional, and discerning watchmakers will not be disappointed.

The primary difference between the Clean Factory Rolex GMT Master II M126710BLNR-0002 and M126710BLNR-0003 is the strap type:

M126710BLNR-0002: Equipped with a Jubilee strap.

M126710BLNR-0003: Equipped with an Oyster strap.

Please see below for a detailed description of the various advantages:

This factory-replica Rolex GMT Master II ceramic bezel features rounded corners at the 12 o'clock triangle, top corners, and bottom corners, and sharp corners, consistent with the original.

The watch case is entirely made of 904L stainless steel, perfectly recreating the overall GMT case shape and refining the GMT's rotating feel. The crown and handle also feature an embossed crown. It uses the same caliber 3285 movement as the original. The caseback is also polished and brushed, consistent with the original, while the bottom of the case is brushed. The fit between the caseback and the case is nearly identical. You can compare the gap between the handle and the case yourself.

When it comes to fonts, depth is only one aspect. The original process required the bottom of the font to be perpendicular to the main body of the font at a 90-degree angle. This effect can only be achieved through integrated molding. Laser typing can result in a series of problems such as bevels, rough shadows, and collapsed edges.

The font depth is consistent with the original, sinking 0.13 mm. A corner of the front edge has been polished, and the plating color has been digitally adjusted. While most products on the market are pure gold, the original will have a slight reddish tint. Visually, it's much more pleasing.

Regarding the inner shadow, the tail of the "R" has been corrected throughout the series and is now slightly protruding. If I had to nitpick, it would be the inner shadow. The shadow isn't as detailed as before, due to the limitations of domestic laser technology and equipment.

Specification

Features	
Brand	Rolex
Model	GMT Master II
