Short Description

Thank you for your interest! Clean Factory has released a replica Rolex GMT-Master II 116710LN-0001. Available with a black dial, this replica features a custom caliber 3186 movement, a minimalist design, and a classic black finish. We offer you exceptional replica craftsmanship.

Description

Look out, everyone! A Qing factory replica Rolex GMT Master II 116710LN-0001 black watch is available. This Qing factory replica Rolex GMT Master II ceramic bezel features rounded corners at the 12 o'clock triangle, top corners, and bottom corners, and sharp corners, identical to the original. This watch is paired with a metal bracelet. The dial is clean and bright, polished to a beautiful sheen. The custom-made movement provides powerful and stable power, ensuring worry-free operation. Ingenious attention has also been paid to meticulous craftsmanship in other details. We uphold a meticulous and professional attitude to provide you with a superior experience.

Regarding the font on this watch, shading is only one aspect. The original method was to create a 90-degree angle between the bottom of the font and the vertical portion. This effect can only be achieved through integral molding using a mold. Laser typing is prone

to problems such as chamfered corners, rough shadows, and uneven edges.

The font depth is consistent with the authentic product, sunken 0.13 mm. A corner of the front edge has been polished, and the plating color has been digitally adjusted. While most products on the market are pure gold, the authentic product will have a slightly reddish tint, which creates a more comfortable and natural look.

The case is crafted entirely from 904L stainless steel, perfectly recreating the overall GMT case shape and enhancing the GMT's rotating feel. The crown and stem feature an embossed crown effect. The caseback is polished and brushed, consistent with the authentic product. The bottom of the case is also brushed, and the caseback and outer case are nearly identical. The gap between the stem and the case can be compared.

Regarding the internal shading, the tail of the "R" has been corrected throughout the series, making it slightly more prominent. If there is one point of criticism, it's the internal shading. Due to the limitations of domestic laser technology and equipment, the shading details are not as refined as before.

Specification

Features	
Brand	Rolex
Model	GMT Master II
Serial Number	116710LN-0001
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.3186 Automatic Movement
