Price: ~~\$850.00~~ \$619.00

Short Description

I would like to recommend this Clean Factory-released Rolex GMT-Master II 116713-LN-78203 replica watch. This replica watch is available with a black dial and is equipped with a customized 3186 movement. It has a stylish appearance, exquisite workmanship, and is durable.

Description

Welcome, everyone! This issue features a factory-clearance replica Rolex GMT Master II 116713-LN-78203 watch. The dial is black with gold accents. The strap is also gold, creating a unique and elegant look. The polished metal has a stunning sheen, revealing the meticulous craftsmanship. Compared to other replica watches, its quality is superior. I hope this watch will impress and leave a lasting impression.

The ceramic bezel of this factory-clearance replica Rolex GMT Master II gold watch features rounded corners at the 12 o'clock triangle, top corners, and bottom corners, and sharp corners, consistent with the original.

When it comes to fonts, shading is only one aspect. The original method was to create a 90-degree angle between the bottom of the font and the vertical. This effect can only be achieved through integral molding. Laser typing is prone to problems such as chamfered corners, rough shadows, and uneven edges.

The font depth is consistent with the authentic model, sunken 0.13 mm. The corner of the font has been polished, and the plating color has been digitally adjusted. While most products on the market are pure gold, the authentic model will have a slightly reddish tint. This design is visually more comfortable and natural.

The case is crafted entirely from 904L stainless steel, perfectly recreating the overall GMT case shape and enhancing the GMT's rotating feel. The crown handle features an embossed crown effect. The caseback is polished and brushed, consistent with the authentic model. The case bottom is also brushed, and the caseback and case are nearly identical. The gap between the handle and case can be detected by comparing the watch face.

Regarding the internal shading, the tail of the "R" has been corrected across the entire series, making it slightly more prominent. If there is one area of nitpicking, it's the internal shading. Due to the limitations of domestic laser technology and equipment, the shading details are not as refined as before.

Specification

Features	
Brand	Rolex
Model	GMT Master II
Serial Number	116713-LN-78203
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.3186 Automatic Movement
