Short Description

Welcome friends, I am honored to introduce this Rolex Daytona M116505-0016 replica watch released by Clean Factory. The replica watch has a white dial and is equipped with a customized 4130 movement. It is combined with rose gold color, noble and beautiful, and has extraordinary temperament.

Description

Let's continue our exploration and take a look at Clean Factory's top replica Rolex Daytona series M116505-0016. The dial color is transparent white with a faint rose gold halo, and the outer ring and strap are both rose gold, which is harmonious and unified. The dial scale is also rose gold, and the shape is similar to a small arrow, which is cute and special. Overall, this watch has a beautiful and generous appearance and is particularly pleasing to the eye. It has created a special design that is not monotonous and dull. It gives people a very energetic and dynamic feeling.

Let's take a look at the more detailed introduction:

The impeccable black enamel dial has zero color difference, and each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

The watch is equipped with a new Cal.4130 automatic winding movement exclusively customized by Rolex, and the thickness is consistent with the original. Each function is 100% realized, equipped with an unprecedented customized KIF shock absorber. The entire assembly is designed with the original Cal. 4130 movement, and all three plywoods are impeccably consistent with the original from the chamfers to the sunray pattern, respecting the original design at a 1:1 ratio. This not only surpasses all Daytona replicas on the market, but is also the only replica that can match the original.

Clean Factory's Rolex Daytona replica watch uses 904L material, 4130 movement, AR strap, simple dial/unique version, simple ceramic ring and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edge. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The luminous filling is moderate in height, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

Clean Factory Brand New Internal Memory Steel Plate and Metal Strap

Specification

Features	
Brand	Rolex
