Short Description

Friends who like Rolex should not miss this Rolex Daytona 116589 replica watch released by Clean Factory. The replica watch has a pomegranate-colored dial to choose from and is equipped with a customized 4130 movement. It has a beautiful appearance and unparalleled interior that can instantly capture people's hearts and make people love it.

Description

Welcome, friends; continue to explore the Clean Factory replica Rolex Daytona 116589 watch. The dial of this watch is pomegranate, which is a fashionable color, and the strap is a dark gray rubber strap. The dial scale is inlaid with diamonds, and the black hands match the color of the dial. Compared with the metal strap, this model is more casual. The beautiful color and casual temperament blend together, which is very suitable and pleasing to the eye.

The Daytona series will be carefully assembled with three layers of dials, and each part is electroplated. The bezel is precisely matched with black oil injection, presenting the same matte effect as the original.

The watch is equipped with a new Cal.4130 automatic winding movement exclusively customized by Rolex, and the thickness is consistent with the original. Each function is 100% realized, equipped with an unprecedented customized KIF shock absorber. The entire assembly is designed with the original Cal. 4130 movement, and all three plywoods are impeccably consistent with the original, from the chamfers to the sunray pattern, respecting the original design at a 1:1 ratio. This not only surpasses all Daytona replicas on the market but is also the only replica that can match the original.

Clean Factory's Rolex Daytona replica watch uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edge. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The luminous filling is moderate in height, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

Clean Factory Brand New Internal Memory Steel Plate and Fluorine Rubber Strap
