Short Description

Thank you for your attention. This time, I recommend to you the Rolex Daytona M116515LN-0057 replica watch released by Clean Factory. The replica watch has a black dial and is equipped with a customized 4130 movement. This is a classic watch with a cool shape and powerful power.

Description

Continue to explore the boutique of the Clean Factory. This replica Rolex Daytona series M116515LN-0057 watch has a black dial, three small dials in rose gold, and a dark gray rubber strap, which complements the black dial. The scale is inlaid with diamonds, and the temperament is extraordinary. The black and gold color scheme highlights the kingly style and is unique.

In addition, it has an impeccable black enamel dial with zero color deviation, and each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

And unprecedented use of customized KIF shock absorbers, which are known for their high-end positioning. Usually, due to cost constraints, the development of replica

movements will avoid the use of such shock absorbers, but C Factory spared no effort to ensure the use of such shock absorbers. The entire movement is based on the authentic Cal. The entire movement is based on the authentic movement 4130, and the design of the authentic one is followed. From chamfers to sun patterns, all three layers respect the original design with a perfect 1:1 ratio.

This Clean Factory Rolex Daytona replica watch uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The luminous filling is moderately high, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the authentic one.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

The above are the advantages of this replica watch; please appreciate it.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116515LN-0057
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
