The replica watch is available with a black dial and is equipped with a customized 4130 movement. It has a gorgeous appearance and high quality, which can bring out a person's unique temperament.

Description

Continue to explore the Rolex Daytona series M116505-0015 rose gold watch carefully crafted by the Clean Factory. This watch has a black dial and a metal strap. It adopts a black and rose gold matching design, the dial scale is inlaid with diamonds, and various details show quality. It exudes an extraordinary charm, a kind of goodwill that makes people inexplicably trust. The glossiness of the whole body shows the texture of the watch to the fullest. With its excellent quality, it is popular with the public.

This replica watch is made with excellent craftsmanship, and its black enamel dial is impeccable with zero color difference. Every component on the carefully assembled three-layer dial is electroplated. The bezel is precisely matched with black oil injection, presenting a matte effect exactly the same as the original.

In addition, the watch is equipped with a new Cal.4130 automatic winding movement exclusively customized by Rolex, and the thickness is consistent with the original. Every function is 100% realized, equipped with an unprecedented customized KIF shock absorber. The entire assembly is designed in the same way as the original Cal. 4130 movement, and the three plywoods are impeccable with the original movement from chamfers to sunray patterns, respecting the original design at a 1:1 ratio. This not only surpasses all Daytona replicas on the market but is also the only replica that can match the original.

And it is unprecedented to use a custom KIF shock absorber, which is known for its high-end positioning. Normally, due to cost constraints, the development of replica movements will avoid the use of such shock absorbers, but C Factory spared no effort to ensure the use of such shock absorbers. The entire movement is based on the authentic Cal. 4130 movement, following the original design; from chamfers to sunray patterns, all three layers respect the original design at a perfect 1:1 ratio.

Such a fine product, friends should not miss it easily.

Specification
