Short Description

I am honored to introduce to you this Rolex Daytona M116515LN-0059 replica watch released by Clean Factory. The replica watch has a rose gold dial to choose from and is equipped with a customized 4130 movement. It is exquisite and beautiful, with excellent quality. Friends who like it can pay attention to more details.

Description

Without further ado, let's continue our exploration journey and introduce the Clean Factory replica Rolex Cosmograph Daytona M116515LN-0059 watch. The dial color of this watch is rose gold, with a rubber strap. This rose gold color is not as strong and bright as gold; it presents a slightly light gold. A more everyday color, warmer and softer than black and white. So it is a watch that makes people feel very comfortable.

Here is a more detailed description for everyone:

The exquisite three-layer dial has no color difference or flaws, and each part is electroplated. The bezel is filled with precisely matched black oil to present the same matte effect as the original.

The watch is equipped with a new customized Rolex-exclusive Cal. 4130 automatic winding movement, and the thickness is consistent with the original. Every function is 100% realized, equipped with an unprecedented customized KIF shock absorber. The entire assembly follows the design of the genuine Cal.4130 movement, and all three plywoods perfectly reflect the genuine product from the chamfers to the sun pattern, maintaining 1:1 respect for the original design. This not only surpasses all Daytona replicas on the market but is also the only replica that can compete with the original.

Clean Factory's replica Rolex Daytona watch uses 904L material, 4130 movement, an AR strap, a clean dial/unique version, a clean ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, and no white edge can be seen. The curvature of the glass edge is consistent with the original, the height of the ceramic ring protruding from the glass is consistent with the original, the ceramic ring has a stronger rounded feel, the font is clean, and the edge of the ceramic ring is slightly rounded.

The luminous fill height is moderate and the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case fits seamlessly, the top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116515LN-0059
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
Hands and Markers	Black-edge hands and hour markers precisely replicate the design and shape of the original

Bezel	Fixed 18K Everose gold bezel with an engraved tachymeter scale, a key feature of the Daytona design. The bezel's polished finish enhances the overall sleek and refined aesthetic of the timepiece.
Crystal	Scratch-resistant sapphire crystal with an anti-reflective coating, ensuring durability while reducing glare for enhanced visibility. The crystal preserves the integrity of the dial, allowing for clear readability in all lighting conditions.
Dial	The rose gold dial is enhanced with contrasting black subdials for a sleek, high-contrast appearance. Luminous hands and markers ensure legibility in low-light conditions, enhancing the watch's functionality. Chronograph subdials for accurate time measure
Bracelet	Type: 18K Everose gold Oyster bracelet, designed for comfort and lasting durability. Equipped with an Oysterlock folding clasp, providing a secure and adjustable fit. The bracelet's elegant design complements the luxurious look of the watch, ensuring both
