Price: ~~\$1,049.00~~ \$729.00

Short Description

The pace of replicating classics will not stop. Let's take a look at the Rolex Daytona 116520-78590 replica watch released by Clean Factory. The replica watch is available with a black dial and equipped with a customized 4130 movement. The appearance is classic and fashionable, and the extraordinary quality has won many praises.

Description

I am honored to have the opportunity to introduce this clean factory replica Rolex Cosmograph Daytona 116520-78590 watch. The dial color is black, with a gray metal strap. The classic small disc design on the dial is pleasing and very practical. The black and gray combination is classic and durable, and it belongs to the type that you like more and more, even if it is old. The overall texture is very good, which is the level that only craftsmen with superb craftsmanship can produce.

This clean factory replica Rolex Daytona watch is made of 904L material, 4130 movement, AR strap, clean dial/unique version, clean ceramic bezel, and polished factory hands, with a thickness of 12.2-12.3.

Exquisite enamel black dial, zero color difference, carefully assembled three-layer dial,

each part is electroplated. The bezel is filled with precisely matched black oil to present the same matte effect as the original.

Unprecedented use of custom KIF shock absorbers, which are known for their high-end positioning. Due to cost constraints, this type of shock absorber is usually avoided in the development of replica movements, but Factory C spared no expense to ensure its use. The entire movement is modeled after the authentic Cal.4130, following the authentic design, from chamfers to sunray patterns; all three layers respect the authentic design, with a perfect 1:1 ratio.

The joint between the glass and the case is completely transparent, and no white edges can be seen. The curvature of the glass edge is consistent with the authentic, the height of the ceramic ring protruding from the glass is consistent with the authentic, the ceramic ring has a stronger rounded feel, the font is clean, and the edge of the ceramic ring is slightly rounded.

The luminous filling height is moderate, the brightness is good, the font printing is three-dimensional, and the size of the small black circle is consistent with the authentic.

The strap or case fits seamlessly, the top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the authentic.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	116520-78590
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
Hands and Markers	Black-edge hands and hour markers precisely replicate the design and shape of the original
Bezel	Fixed stainless steel bezel with an engraved tachymeter scale, a signature feature of the Daytona model. The polished bezel enhances the overall refined design of the timepiece.
Crystal	Scratch-resistant sapphire crystal with anti-reflective coating, ensuring durability and clear

	readability. The crystal protects the dial from everyday wear while reducing glare in different lighting conditions.
Dial	The black dial is equipped with white hour markers and subdials for enhanced contrast and legibility. Luminous hands and markers provide visibility in low light conditions. Chronograph subdials offer precise timing for minutes, hours, and seconds, while t
Bracelet	Type: 904L stainless steel Oyster bracelet, offering superior comfort and durability. Equipped with an Oysterlock folding clasp, ensuring a secure and adjustable fit. The bracelet seamlessly combines both style and practicality, providing a balanced aesth
