Short Description

Thank you for your attention. I sincerely recommend this Rolex Daytona M116519LN-0027 replica watch released by Clean Factory. This replica watch is available with a gray dial and is equipped with a customized 4130 movement. It has exquisite workmanship, a fashionable appearance, and is a tasteful choice.

Description

We continue to present to to you the fine product, the Rolex Daytona M116519LN-0027 replica watch carefully crafted by the Clean Factory. The dial color of this watch is gray, and the strap is also a dark gray rubber strap of the same color. The three disc scales are matched with black. The whole watch is gray and black, simple and neat; the overall look is smooth and comfortable and feels particularly harmonious. This watch is beautiful and versatile; I hope it can fall into your heart and be liked by you.

This watch uses a customized KIF shock absorber, which is known for its high-end positioning. Usually, due to cost constraints, the development of replica movements will avoid the use of such shock absorbers, but C Factory spared no effort to ensure the use of such shock absorbers. The entire movement is based on the authentic Cal. The entire movement is based on the authentic movement 4130, and the authentic design is used.

From chamfers to sun patterns, all three layers respect the original design with a perfect 1:1 ratio.

The impeccable black enamel dial has zero color difference, and each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

This Rolex Daytona replica watch uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly arced.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

The luminous filling is of moderate height and good brightness, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116519LN-0027
