Short Description

Clean Factory, a company specializing in creating high-quality replica watches, has released the Rolex Daytona M116509-0064 replica watch. The replica watch is available with a silver-white dial and is equipped with a customized 4130 movement. It has excellent quality and demonstrates a strong level of craftsmanship.

Description

Welcome, friends. Come and pay attention to this replica Rolex Daytona M116509-0064 mother-of-pearl watch launched by the Clean Factory. The dial of this watch is silver-white, with a metal strap. The shell color reminds me of the seaside and the sea breeze. Such an elegant watch is like the gentle breeze blowing from the seaside in calm times, soft and light, but it is very comfortable to look at. With its company, the heart will be more determined.

This watch is equipped with a new Cal.4130 automatic winding movement exclusively customized by Rolex, and the thickness is consistent with the original. Each function is 100% realized and equipped with an unprecedented customized KIF shock absorber. The entire assembly is designed with the original Cal. 4130 movement, and all three plywoods are impeccably consistent with the original, from chamfers to sun pattern patterns,

respecting the original design at a 1:1 ratio. This not only surpasses all Daytona series replicas on the market but is also the only replica that can compare with the original.

It has an impeccable black enamel dial with zero color difference, and each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

Clean Factory's Rolex Daytona replica watch is made of 904L material, 4130 movement, AR strap, simple dial/unique version, simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edge. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The luminous filler is of moderate height and good brightness, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case and the watch head are concave, which is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116509-0064
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
