The replica watch has a white dial and is equipped with a customized 4130 movement, which is powerful and stable. This replica watch is of high quality and beautiful appearance and is a top-notch work.

Description

Let's continue to explore this Rolex Daytona M116508-0007 Mother of Pearl Dial replica watch. It is still launched by the Clean Factory. The dial of this watch is pearl white. It is paired with a gold metal strap. This watch exudes a noble temperament. It has its own aura and shocks your heart. Who can escape its dazzling light? The impeccable quality makes you choose it without hesitation. This is the confidence of the product from the Clean Factory.

Here are the advantages in all aspects:

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly arced.

The impeccable black enamel dial has zero color difference, and each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

The watch is equipped with a new Cal.4130 automatic movement customized by Rolex, and its thickness is consistent with the original. Each function is 100% realized, equipped with an unprecedented customized KIF shock absorber. The design of the entire assembly is consistent with the original Cal. 4130 movement, and all three splints are impeccably consistent with the original, from chamfers to sunray patterns, respecting the original design at a 1:1 ratio. This not only surpasses all replicas of the Daytona series on the market but is also the only replica that can match the original.

The Rolex Daytona replica watch from Clean Factory uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The luminous filling is moderately high, the brightness is good, the font printing is three-dimensional, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the genuine product.

The bottom of the strap/case is concave with the watch head, which is consistent with the genuine product.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116508-0007
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
Hands and Markers	Black-edge hands and hour markers precisely replicate the design and shape of the original
Bezel	Fixed 18K yellow gold bezel with engraved

	tachymeter scale, a signature feature of the Daytona design. The polished bezel adds to the watch's luxurious appearance and enhances its overall refinement.
Crystal	Scratch-resistant sapphire crystal with an anti-reflective coating, providing clarity and protecting the dial from everyday wear. Ensures clear visibility while preserving the integrity of the timepiece.
Dial	The iridescent Mother of Pearl dial enhances the beauty and luxury of the watch with a unique, shimmering finish. Black subdials provide a high contrast for optimal readability and precision. Luminous hands and hour markers ensure visibility in low-light
Bracelet	Type: 904L stainless steel and 18K yellow gold Oyster bracelet, providing both comfort and durability. Equipped with an Oysterlock folding clasp, ensuring a secure and adjustable fit. The sleek design balances practicality and elegance.
