**Weight:** 0.00kg  
**Dimensions:** 0.00cm x 0.00cm x 0.00cm

**Price:** ~~\$1,199.00~~ \$799.00

## Short Description

With much anticipation, let's take a look at the Rolex Daytona M116515LN-0019 replica watch released by Clean Factory. The replica watch is available with a white dial and is equipped with a customized 4130 movement. The stylish and casual style will surely capture your heart.

## Description

Let's continue the journey of exploration and see how attractive it is. This replica Rolex Daytona M116515LN-0019 watch is produced by a clean factory. White dial with gray and black rubber strap. All the details of the dial are in place compared to the original, with beautiful appearance and exquisite workmanship. The rubber strap has a more casual temperament, suitable for a variety of daily styles.

The watch is equipped with a new Cal.4130 automatic winding movement customized by Rolex, and the thickness is consistent with the original. Each function is 100% realized and equipped with an unprecedented customized KIF shock absorber. The design of the entire assembly is consistent with the original Cal. 4130 movement, and all three plywoods are impeccably consistent with the original, from chamfers to sunray patterns, respecting the original design at a 1:1 ratio. This not only surpasses all Daytona series replicas on the market but is also the only replica that can match the original.

The impeccable black enamel dial has zero color deviation, and each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

The Rolex Daytona replica watch from Clean Factory uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edge. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The luminous filler is of moderate height and good brightness, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

Clean Factory Brand New Internal Memory Steel Plate and Fluorine Rubber Strap
