The replica watch has a white dial to choose from and is equipped with a customized 4130 movement. It has a stylish appearance and elegant colors that are durable. It is an exquisite replica watch.

Description

We are happy to provide you with satisfactory service. We sincerely recommend this clean factory replica Rolex Daytona M116519LN-0026 watch. The dial of this watch is white, with a dark gray rubber strap. The color combination is simple and elegant, and it is versatile for daily use. With a gentle temperament, it comes slowly, standing in front of you like a lady from a noble family, looking forward to your appreciation, and I hope it can give you a long-term companionship. The breeze blows, and you are still there.

More advantages and details are waiting for you to discover.

This watch is equipped with a new Cal.4130 automatic winding movement exclusively customized by Rolex, and the thickness is consistent with the original. Each function is 100% realized, equipped with an unprecedented customized KIF shock absorber. The entire assembly is designed with the original Cal. 4130 movement, and all three splints are impeccably consistent with the original, from chamfers to sunray patterns, respecting

the original design at a 1:1 ratio. This not only surpasses all Daytona replicas on the market but is also the only replica that can match the original.

Clean Factory's Rolex Daytona replica watch uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The impeccable black enamel dial has zero color difference, and each component on the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The luminous filler is moderate in height, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the head, which is consistent with the original.

Clean Factory Brand New Internal Memory Steel Plate and Fluorine Rubber Strap
