Short Description

The boutique that you can't miss is this Rolex Daytona M116518LN-0047 replica watch released by Clean Factory. The replica watch has a black dial and is equipped with a customized 4130 movement. It is of excellent quality and extraordinary style. It brings you an extraordinary experience.

Description

It is still the masterpiece brought by our Clean Factory, the replica Rolex Daytona M116518LN-0047 watch. This watch has a black dial and a dark gray rubber strap. The three small eyes on the dial, the iconic feature of the Daytona, are designed with gold. The contrast of color difference makes people immediately attracted, and it is difficult not to notice it. A very exquisite watch.

The seam between the glass and the case of this replica watch is completely transparent, with no obvious white edge. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly arced.

The luminous filling is moderate in height, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The impeccable black enamel dial has zero color deviation, and each component of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

The watch is equipped with a new Cal.4130 automatic movement customized by Rolex, and its thickness is consistent with the original. Each function is 100% realized, equipped with an unprecedented customized KIF shock absorber. The design of the entire assembly is consistent with the original Cal. 4130 movement, and all three bridges are impeccably consistent with the original, from chamfers to sunray patterns, respecting the original design at a 1:1 ratio. This not only surpasses all replicas of the Daytona series on the market but is also the only replica that can match the original.

Clean Factory's Rolex Daytona replica watch uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case and the watch head are concave, which is consistent with the authentic ones.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116518LN-0047
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
Hands and Markers	Black-edge hands and hour markers precisely replicate the design and shape of the original
Bezel	Fixed black ceramic bezel with engraved tachymeter scale. The contrast between the golden case and the black bezel enhances the watch’s luxurious and sporty appeal.

Crystal	Scratch-resistant sapphire crystal with an anti-reflective coating to reduce glare and maintain the clarity of the dial. Ensures that the watch remains visually pristine, even with regular wear.
Dial	The black dial is accented with white hour markers and gold-tone subdials for a striking contrast. Luminous hands and markers ensure visibility even in low-light environments. Chronograph subdials to measure minutes, hours, and seconds with high accuracy,
Bracelet	Type: 18k yellow gold Oyster bracelet for ultimate comfort and elegance. Equipped with an Oysterlock folding clasp to ensure a secure and adjustable fit. The bracelet is designed to balance both style and functionality, offering long-lasting durability.
