Short Description

Clean Factory has released the Rolex Explorer M116500LN-0002 replica watch. The replica watch is available with a black dial and equipped with a customized 4130 movement. It has a stylish appearance and is both beautiful and practical. It is your choice of taste; I hope you like it.

Description

Continuing our journey of exploration, Clean Factory launches the replica Rolex Daytona M116500LN-0002 watch. This watch has a black dial and a metal strap. The three small discs of Daytona's logo are vivid on the dial. It adds a vivid interest to the whole watch and has a practical function. Black is good-looking and versatile. The low-key feeling that is hidden deep gives you the style you want without being too eye-catching. It is the first choice for you who are calm and low-key.

The strap or case of the replica watch is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the head, which is consistent with the original.

The impeccable black enamel dial has zero color difference, and each part of the carefully

assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

The watch is equipped with a new Cal.4130 automatic movement customized by Rolex, and its thickness is consistent with the original. Each function is 100% realized and equipped with an unprecedented customized KIF shock absorber. The design of the entire assembly is consistent with the original Cal. 4130 movement, and all three splints are impeccably consistent with the original, from chamfers to sunray patterns, respecting the original design at a 1:1 ratio. This not only surpasses all replicas of the Daytona series on the market but is also the only replica that can match the original.

Clean Factory's Rolex Daytona replica watch uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edge. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly arced.

The luminous filling is of moderate height, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116500LN-0002
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
Hands and Markers	Black-edge hands and hour markers precisely replicate the design and shape of the original
Bezel	Fixed black ceramic bezel with engraved

	tachymeter scale, a signature feature of the Daytona design. The black ceramic bezel offers a perfect contrast to the polished stainless steel case, adding to the watch's overall luxurious look.
Crystal	Scratch-resistant sapphire crystal with anti-reflective coating to enhance clarity and reduce glare. The crystal ensures that the dial remains clear and protected from everyday wear and tear.
Dial	The black dial is accented with white hour markers and subdials for excellent contrast and readability. Luminous hands and markers ensure visibility even in low-light conditions. Chronograph subdials to measure minutes, hours, and seconds, along with a ta
Bracelet	Type: 904L stainless steel Oyster bracelet for maximum comfort and durability. Equipped with an Oysterlock folding clasp, providing a secure and adjustable fit. The sleek design of the bracelet ensures the watch remains both stylish and practical.
