Short Description

Clean Factory has released the Rolex Daytona M116500LN-0001 replica watch. The replica watch is available with a white dial and is equipped with a customized 4130 movement. It has excellent texture and a stylish appearance, making it suitable for daily wear on a variety of occasions.

Description

Continue the journey of exploration with this replica Rolex Daytona M116500LN-0001 watch launched by the Clean Factory. The dial color is white, with a metal strap. The temperament of this watch is very elegant and unique, gentle and pleasant. The plain white is very comfortable to look at, refreshing, and simple. It is like a cool breeze on a hot summer day, blowing away the heat and bringing tranquility.

Let's pay attention to more details:

The impeccable black enamel dial has zero color deviation, and each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

The watch is equipped with a new Cal.4130 automatic winding movement exclusively customized by Rolex, and the thickness is consistent with the original. Each function is 100% realized and equipped with an unprecedented customized KIF shock absorber. The entire assembly is designed with the original Cal. 4130 movement, and all three plywoods are impeccably consistent with the original, from the chamfers to the sunray pattern, respecting the original design at a 1:1 ratio. This not only surpasses all Daytona replicas on the market but is also the only replica that can match the original.

The Rolex Daytona replica watch from Clean Factory uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The luminous filler is moderately high, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116500LN-0001
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
Hands and Markers	Black-edge hands and hour markers precisely replicate the design and shape of the original
Bezel	Fixed black ceramic bezel with an engraved tachymeter scale, providing the signature Daytona functionality and aesthetic. The black ceramic bezel contrasts beautifully with the stainless steel

	case, further emphasizing the watch's timeless elegance.
Crystal	Scratch-resistant sapphire crystal with an anti-reflective coating to reduce glare and enhance visibility. The crystal provides a clear view of the dial while maintaining the watch's durability.
Dial	The white dial is complemented by black subdials and hour markers for excellent contrast and readability. Luminous hands and markers ensure visibility even in low-light environments. Chronograph subdials for measuring minutes, hours, and seconds, alongsid
