Short Description

Clean Factory has released the Rolex Daytona M116503-0004 replica watch. The replica watch has a black dial and is equipped with a customized 4130 movement. It has an exquisite appearance and a stable and powerful internal combination. It is comfortable to wear and very practical.

Description

Welcome, friends. Come and learn more about this Clean Factory replica Rolex Daytona M116503-0004 watch. This watch has a black dial with a gold color and a metal strap. At first glance, it is a watch that is atmospheric and stable. The gold is just right, not too saturated. So it complements the black, sets off each other, and complements each other. This is just the right look; it is very beautiful and suitable.

Clean Factory's Rolex Daytona replica watch is made of 904L material, 4130 movement, AR strap, simple dial/unique version, simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The impeccable black enamel dial has zero color deviation, and each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched

black grease to present a matte effect exactly the same as the original.

The watch is equipped with a new Cal.4130 automatic movement customized by Rolex, and its thickness is consistent with the original. Each function is 100% realized, equipped with an unprecedented customized KIF shock absorber. The design of the entire assembly is consistent with the original Cal. 4130 movement, and all three plywoods are impeccably consistent with the original, from chamfers to sunray patterns, respecting the original design at a 1:1 ratio. This not only surpasses all replicas of the Daytona series on the market but is also the only replica that can match the original.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The luminous filling is of moderate height and good brightness, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the genuine product.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116503-0004
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
Hands and Markers	Black-edge hands and hour markers precisely replicate the design and shape of the original
Bezel	Fixed 18K yellow gold bezel with an engraved tachymeter scale, allowing for precise speed

	measurements. The polished bezel complements the overall design and adds to the watch's high-end aesthetic.
Crystal	Scratch-resistant sapphire crystal with an anti-reflective coating to reduce glare and protect the dial from scratches and everyday wear. Ensures clear visibility while maintaining the watch's integrity.
Dial	The gold-tone dial features black subdials for optimal contrast, ensuring excellent readability. Luminous hands and markers ensure clear visibility even in low-light conditions. Chronograph subdials for accurate measurement of minutes, hours, and seconds,
Bracelet	Type: 904L stainless steel and 18K yellow gold Oyster bracelet for both comfort and durability. Equipped with an Oysterlock folding clasp for a secure and adjustable fit. The sleek design ensures the perfect balance of style and functionality.
