Short Description

Clean Factory has released the Rolex Daytona M116503-0008 replica watch. The replica watch is available with a black dial and is equipped with a customized 4130 movement. It is loved by the public for its exquisite workmanship and excellent quality.

Description

We have been on the road of creating exquisite replica watches. This issue recommends this replica Rolex Daytona M116503-0008 watch launched by Clean Factory. The dial color of this watch is black, with a metal strap to create a gold color scheme. The dial scale is inlaid with diamonds, which is exquisite and beautiful. Compared with the conventional scale display, it has a more beautiful appearance and is special. The whole watch is more unique and beautiful in addition to being classic and fashionable.

Continue to pay attention to more details:

The impeccable black enamel dial has zero color deviation, and each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

The watch is equipped with a new Cal.4130 automatic winding movement exclusively customized by Rolex, and the thickness is consistent with the original. Each function is 100% realized and equipped with an unprecedented customized KIF shock absorber. The entire assembly is designed with the original Cal. 4130 movement, and all three plywoods are impeccably consistent with the original, from the chamfers to the sunray pattern, respecting the original design at a 1:1 ratio. This not only surpasses all Daytona replicas on the market but is also the only replica that can match the original.

The Rolex Daytona replica watch from Clean Factory uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edges. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The luminous filler is moderately high, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116503-0008
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
Hands and Markers	Black-edge hands and hour markers precisely replicate the design and shape of the original
Bezel	Fixed 18K yellow gold bezel with engraved tachymeter scale, offering precise speed measurement and complementing the luxurious design of the watch. The polished bezel enhances

	the overall sophisticated look of the timepiece.
Crystal	Scratch-resistant sapphire crystal with an anti-reflective coating to reduce glare and protect the dial. The crystal ensures clear visibility while maintaining the integrity of the timepiece.
Dial	The dial is a sleek and sophisticated gold-tone with contrasting black subdials. Luminous hour markers and hands ensure visibility even in low-light conditions. Chronograph subdials for precise measurement of minutes, hours, and seconds, and a tachymeter
Bracelet	Type: 904L stainless steel and 18K yellow gold Oyster bracelet for durability and elegance. Equipped with an Oysterlock folding clasp for a secure and adjustable fit. The bracelet's design strikes a perfect balance of practicality and luxury.
