Short Description

Everyone knows that Clean Factory has released a replica Rolex Daytona 116509, so let's take a look at it. This replica watch is available with a white dial and is equipped with a customized 4130 movement. It has a stylish and beautiful appearance and efficient and powerful power.

Description

Highly recommend Clean Factory Rolex Cosmograph Daytona 116509 Silver White Dial Fluoro Rubber Strap.

This watch has a white dial and a dark grey rubber strap. The white model gives a smooth and clean look. The three black dials in the center are like three bright black pearls, mysterious and elegant, with a unique temperament that jumps out and brings your unique temperament.

With such beautiful imitation craftsmanship, it is hard not to fall in love with it. It is an almost perfect replica, but you don't need to pay too much to own it. The charming charm and extraordinary style it presents will definitely fascinate you deeply. Various more detailed highlights are presented below:

This series has achieved an impeccable black enamel dial with zero color difference, and each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease to present a matte effect exactly the same as the original.

Clean Factory's fake Rolex Daytona watch is made of 904L material, 4130 movement, AR strap, simple dial/unique version, simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edge. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The watch is equipped with a new Cal.4130 automatic winding movement exclusively customized by Rolex, and the thickness is consistent with the original. Every function is 100% realized, which not only surpasses all Daytona series imitations on the market but also is the only imitation that can compete with the original. Unprecedented use of customized KIF shock absorbers, which are known for their high-end positioning. Normally, due to cost constraints, the development of replica movements would avoid using this shock absorber, but C Factory spared no expense to ensure the use of this shock absorber, which was a pleasant surprise.

The luminous filling is of moderate height and good brightness, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and there is a slight dent at the tail. The bottom of the strap or case is concave with the head, which is consistent with the original.

High Simulation: Clean Factory strives to be consistent with the original in all details, including the material, polishing, and craftsmanship of the case, dial, and bezel, so that the visual effect of the replica watch is close to the original.

Material and Craftsmanship: Using 904L stainless steel and sapphire crystal mirror consistent with the original, ensure that the case and strap are almost the same as the original in terms of vision and touch.

Movement appearance and function: The imitation Rolex Caliber 4130 movement has almost the same appearance and function, with a chronograph function and a second-hand stop device, high precision, and stability.

Details: The dial details (such as hands, subdials, tachymeter scales, etc.) and brand logos are highly restored, and the fine engraving and logos make the replica look very close to the original.

Suitable for daily wear: Due to its high degree of simulation and high-quality materials, this replica watch is not only close to the original in appearance but also very suitable for daily wear.

No matter how many words are used, it is impossible to explain the charm of this watch. Only when you wear it yourself can you feel the surprise and value it gives. Waiting for you to experience it.

Specification

Features	
Brand	Rolex
Model	Cosmograph Daytona
Serial Number	116509
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal. 4130 Automatic Movement
