Short Description

Clean Factory has released the Rolex Daytona M116508-0013 replica watch. The replica watch is available with a dark green dial and is equipped with a customized 4130 movement. It has a unique appearance and exquisite workmanship. It is an excellent replica watch.

Description

With a sincere heart, I recommend this clean factory replica Rolex Daytona M116508-0013 watch to everyone. The dial color of this watch is a little special; it is dark green or seaweed green, with a full gold metal strap. The collision of dark green and gold, the contrast of color difference. It produces a unique beauty, which is different from the usual gold watch. There is an elegant force in it, which makes people feel so special and interesting.

For more advantages, please see the following:

The impeccable black enamel dial has zero color deviation, and each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

The watch is equipped with a new Cal.4130 automatic winding movement exclusively customized by Rolex, and the thickness is consistent with the original. Each function is 100% realized, equipped with an unprecedented customized KIF shock absorber. The entire assembly follows the design of the genuine Cal.4130 movement. The design of the 4130 movement—all three plywoods are impeccably consistent with the original, from the chamfers to the sunray pattern, respecting the original design at a 1:1 ratio. This not only surpasses all Daytona replicas on the market but is also the only replica that can match the original.

Clean Factory's Rolex Daytona replica watch uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edge. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The luminous filling is moderate in height, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the genuine product.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116508-0013
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.4130 Automatic Movement
Case Size	40mm
Case Material	904L Stainless Steel
