Short Description

Welcome everyone to pay attention to the Rolex Daytona M116508-0004 replica watch released by Clean Factory. The replica watch is available with a black dial and is equipped with a customized 4130 movement. It is a beautiful replica created with excellent craftsmanship.

Description

This is an exquisite replica watch from a clean factory. Replica Rolex Daytona M116508-0004 watch. The dial color is black, with a metal strap. The gold watch series cannot do without the integration of gold, and the excellent glossiness makes the whole watch more luxurious. This is a gesture, elegant and gorgeous, calm and unhurried. Standing in the crowd, you can also feel the strong aura.

There are more advantages as follows:

The impeccable black enamel dial has zero color deviation, and each part of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black grease, presenting a matte effect exactly the same as the original.

The watch is equipped with a new Cal.4130 automatic winding movement exclusively customized by Rolex, and the thickness is consistent with the original. Each function is

100% realized, equipped with an unprecedented customized KIF shock absorber. The entire component follows the design of the genuine Cal.4130 movement. The design of the 4130 movement—all three plywoods are impeccably consistent with the original, from the chamfers to the sunray pattern, respecting the original design at a 1:1 ratio. This not only surpasses all Daytona replicas on the market but is also the only replica that can match the original.

Clean Factory's Rolex Daytona replica watch uses 904L material, 4130 movement, an AR strap, a simple dial/unique version, a simple ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, with no obvious white edge. The curvature of the glass edge is the same as the original, and the height of the ceramic ring protruding from the glass is the same as the original. The ceramic ring is more three-dimensional and rounded, the font is simple, and the edge of the ceramic ring is slightly rounded.

The luminous filling is moderate in height, the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case is seamless. The top of the strap or case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the genuine product.

Specification

Features	
Brand	Rolex
Model	Daytona
