Short Description

Clean Factory has released the Rolex Daytona M116508-0008 replica watch. The replica watch is available with a black dial and is equipped with a customized 4130 movement. It has an exquisite appearance and excellent internal quality. This is a masterpiece among replica watches.

Description

Welcome to visit the factory-cleared imitation Rolex Cosmograph Daytona M116508-0008 gold watch. This watch has a black dial and a gold metal strap. The dial has a diamond design. If the dial is the night sky, then the diamonds on the dial are like stars, spread on the sky, bringing glimmers to the night. The glimmer is not tiny; it is the finishing touch, making the whole watch vivid.

The specific advantages of this watch are as follows:

Exquisite three-layer dial, no color difference, enamel black dial, each part is electroplated. The bezel is filled with precisely matched black oil to present the same matte effect as the original.

The watch is equipped with a new customized Rolex-exclusive Cal.4130 automatic winding movement, which matches the thickness of the original. Each function is 100% realized and equipped with an unprecedented customized KIF shock absorber. The entire assembly follows the design of the genuine Cal.4130 movement, and all three plywoods perfectly reflect the genuine product from the chamfers to the sunburst pattern, maintaining 1:1 respect for the original design. This not only surpasses all Daytona replicas on the market but is also the only replica that can rival the genuine product.

Clean Factory's replica Rolex Daytona watch uses 904L material, 4130 movement, an AR strap, a clean dial/unique version, a clean ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, and no white edge can be seen. The curvature of the glass edge is consistent with the genuine product, the height of the ceramic ring protruding from the glass is consistent with the genuine product, the ceramic ring has a stronger rounded feel, the font is clean, and the edge of the ceramic ring is slightly rounded.

The luminous fill height is moderate, and the brightness is good; the font is printed three-dimensionally, and the size of the small black circle is consistent with the genuine product.

The strap or case fits seamlessly, the top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is flush with the watch head, which is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116508-0008
Gender	Man
Movement Type	Automatic Movement
