Short Description

Clean Factory has released the Rolex Daytona M116515LN-0017 replica watch. The replica watch is available with a black dial and is equipped with a customized 4130 movement. It has a stylish and beautiful appearance, and the watch has a great texture created by exquisite craftsmanship.

Description

This is the replica Rolex Daytona M116515LN-0017 rose gold watch brought by the cleaning factory. This watch has a black dial and a dark gray rubber strap. The rose gold color is integrated into the details, which is very elegant and beautiful. It can be said that it brightens the color of the entire watch. Rose gold is different from the brilliant atmosphere of pure gold. It has its own beauty. It is like a tender and charming charm, which adds a little gentle feeling to the watch.

Let's pay attention to more details:

Exquisite enamel black dial, zero color difference, carefully assembled three-layer dial, each part is electroplated. The bezel is filled with precisely matched black oil to present the same matte effect as the original.

The watch is equipped with a new customized Rolex-exclusive Cal.4130 automatic winding movement, which matches the thickness of the original. Each function is 100% realized and equipped with an unprecedented customized KIF shock absorber. The entire assembly follows the design of the genuine Cal.4130 movement, and all three plywoods perfectly reflect the original from the chamfers to the sun pattern, maintaining 1:1 respect for the original design. This not only surpasses all Daytona replicas on the market but is also the only replica that can rival the original.

Clean Factory's replica Rolex Daytona watch uses 904L material, 4130 movement, an AR strap, a clean dial/unique version, a clean ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The seam between the glass and the case is completely transparent, and no white edges can be seen. The curvature of the glass edge is consistent with the original, the height of the ceramic ring protruding from the glass is consistent with the original, the ceramic ring has a stronger rounded feel, the font is clean, and the edge of the ceramic ring is slightly rounded.

The luminous fill height is moderate and the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The strap or case fits seamlessly, the top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is concave with the watch head, which is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116515LN-0017
Gender	Man
